# Circulation Research

## An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

### Editor

ROBERT M. BERNE, *Charlottesville, Virginia*

### Associate Editors

MATTHEW N. LEVY, *Cleveland, Ohio*

NICK SPERELAKIS, *Charlottesville, Va.*

KENNETH L. ZIERLER, *Baltimore, Md.*

Editorial Office: Department of Physiology, University of Virginia School of Medicine,  
Charlottesville, Virginia 22901

### EDITORIAL BOARD

BERNARD C. ABBOTT, *Los Angeles, Calif.*

J. A. ABILDSKOV, *Salt Lake City, Utah*

ROBERT W. BERLINER, *Bethesda, Md.*

JOHN R. BLINKS, *Rochester, Minn.*

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Volume XXVIII

January-June

1971

No. 1 (January)

<b>Editorial: Circulation Research—1971</b> .....	1
<b>A Mechanism for Reentry in Canine Ventricular Tissue.</b> Betty I. Sasyniuk and Carlos Mendez .....	3
<b>Digitalis-Induced Bundle-Branch Ventricular Tachycardia Studied by Electrode Catheter Recordings of the Specialized Conducting Tissues of the Dog.</b> Anthony N. Damato, Sun H. Lau, and Gustavus A. Bobb ..	16
<b>Mechanism of Synchronization in Isorhythmic A-V Dissociation: III. Computer Model.</b> Matthew N. Levy and Harrison Zieske .....	23
<b>Myocardial Contraction Frequency and Onset of Cardiac Glycoside Action.</b> Jan Koch-Weser .....	34
<b>Diastolic Geometry and Sarcomere Lengths in the Chronically Dilated Canine Left Ventricle.</b> John Ross, Jr., Edmund H. Sonnenblick, Roger R. Taylor, Henry M. Spotnitz, and James W. Covell .....	49
<b>Electrophysiological Characteristics of Canine Atrial Plateau Fibers.</b> Perry M. Hogan and Larry D. Davis .....	62
<b>Mechanism of Action of Tris (Hydroxymethyl) Aminomethane on the Negative Inotropic Effect of Carbon Dioxide.</b> Norberto C. Gonzalez, Horacio E. Cingolani, Alicia R. Mattiazzi, Juan C. Marsiglia, and Juan R. Serur .....	74
<b>Evaluation of Increased Norepinephrine Excretion in Hypertension Using L-Dopa- <sup>3</sup>H.</b> Vincent DeQuattro .....	84
<b>Instructions to Authors</b> .....	98
<b>News from the American Heart Association</b> .....	102

No. 2 (February)

<b>Beta-Receptor Blockade and Myocardial Effects of Cardiac Glycosides.</b> Jan Koch-Weser .....	109
<b>Fourier Analysis of Left Ventricular Performance: Evaluation of Impedance Matching.</b> Francis L. Abel .....	119
<b>Functional Characteristics of the Gating Mechanism in the Canine A-V Conducting System.</b> Robert J. Myerburg, Henry Gelband, and Brian F. Hoffman .....	136
<b>Effect of Oxygen on Growth of Cultured Myocardial Cells.</b> Milton Hollenberg .....	148
<b>Microsphere Measurement of Intrarenal Circulation of the Dog.</b> Lawrence M. Slotkoff, Alexander Logan, Pedro Jose, John D'Avella, and Gilbert M. Eisner .....	158

(Continued)

<b>Action of Diazoxide on Skeletal Muscle Vascular Resistance.</b> Wm. John Powell, Jr., Richard M. Green, Richard B. Whiting, and Charles A. Sanders .....	167
<b>Distribution Theory of Resistance of Neurogenic Vasoconstriction to Alpha-Receptor Blockade in the Rabbit.</b> John A. Bevan and Che Su ..	179
<b>Effects of 6-Hydroxydopamine on the Canine Sinus Node.</b> Victor Elharrar, Jacques de Champlain, and Réginald A. Nadeau .....	188
<b>Conduction of the Cardiac Impulse: I. Delay, Block, and One-Way Block in Depressed Purkinje Fibers.</b> Paul F. Cranefield, Herman O. Klein, and Brian F. Hoffman .....	199
<b>Conduction of the Cardiac Impulse: II. Summation and Inhibition.</b> Paul F. Cranefield and Brian F. Hoffman .....	220
<b>Mechanical Properties of Rat Cardiac Muscle during Experimental Hypertrophy.</b> Oscar H. L. Bing, Satoru Matsushita, Barry L. Fanburg, and Herbert J. Levine .....	234
<b>Converting Enzyme Activity in Human Plasma.</b> Annette Fitz, Graham W. Boyd, and Stanley Peart .....	246
<b>Effects of Altered Smooth Muscle Tone on Aortic Diameter and Aortic Baroreceptor Activity in Anesthetized Rabbits.</b> Harold Aars .....	254
<b>Effect of Ischemia and Antianginal Drugs on the Distribution of Radioactive Microspheres in the Canine Left Ventricle.</b> Lewis C. Becker, Nicholas J. Fortuin, and Bertram Pitt .....	263
<b>Synergistic Effect of Propranolol and Nicotinic Acid on the Inhibition of Plasma Free Fatty Acid Release in the Dog.</b> Manuel J. Lipson, Shapur Naimi, and Samuel Proger .....	270
<b>Total Systemic Vascular Compliance Measured as Incremental Volume-Pressure Ratio.</b> Artin A. Shoukas and Kiichi Sagawa .....	277
<b>New Technique for Determining Instantaneous Myocardial Force-Velocity Relations in the Intact Heart.</b> William Grossman, Harold Brooks, Steven Meister, Herbert Sherman, and Lewis Dexter .....	290
<b>News from the American Heart Association .....</b>	298

## No. 3 (March)

<b>Review: What Signals the Kidney to Release Renin?</b> James O. Davis ..	301
<b>Serum Dopamine-Beta-Hydroxylase Activity.</b> Richard Weinshilboum and Julius Axelrod .....	307
<b>Cardiac Arrhythmias Simulated by Concealed Bundle of His Extrasystoles in the Dog.</b> Anthony N. Damato, Sun H. Lau, and Gustavus Bobb ..	316
<b>Atrial Transmural Pressures during Experimental Pericardial Tamponade.</b> Gerhard A. Brecher and Charles A. Gilbert .....	323
<b>Effects of Immunosympathectomy on Development of High Blood Pressure in Genetically Hypertensive Rats.</b> David W. J. Clark .....	330
<b>Influence of Extracellular Potassium Concentration on Myocardial Uptake and Inotropic Effect of Tritiated Digoxin.</b> Kirk H. Prindle, Jr., C. Lynn Skelton, Stephen E. Epstein, and Frank I. Marcus .....	337

(Continued)

<b>Disorder in Excitation-Contraction Coupling of Cardiac Muscle from Cats with Experimentally Produced Right Ventricular Hypertrophy.</b> Raimund L. Kaufmann, Hermann Homburger, and Heike Wirth .....	346
<b>Fluid Movement in Occluded Single Capillaries of Rabbit Omentum.</b> J. S. Lee, L. H. Smaje, and B. W. Zweifach .....	358
<b>Blood Hyperosmolality and Pulmonary Vascular Resistance in the Cat.</b> Anton Hauge and Gunnar Bø .....	371
<b>Autonomic Control of Cardiac C-AMP.</b> Paul J. LaRaia and Edmund H. Sonnenblick .....	377
<b>News from the American Heart Association .....</b>	385

## No. 4 (April)

<b>Adrenergic Neurohumoral Influences on Circulation and Lipolysis in Canine Omental Adipose Tissue.</b> Kathryn Ballard and Sune Rosell ..	389
<b>Effects of Hypoxia on Pulmonary Vascular Reactivity in Pneumotomized Puppies and Minipigs.</b> H. Kato, L. Kidd, and P. M. Olley ....	397
<b>Circus Movement within the AV Node as a Basis for Supraventricular Tachycardia as Shown by Multiple Microelectrode Recording in the Isolated Rabbit Heart.</b> M. J. Janse, F. J. L. van Capelle, G. E. Freud, and D. Durrer .....	403
<b>Etiology of Pulmonary Artery Dilatation and Hilar Dance in Atrial Septal Defect.</b> Derek R. Boughner and Margot R. Roach .....	415
<b>Cerebral Ischemia and Reactive Hyperemia: Studies of Cortical Blood Flow and Microcirculation before, during, and after Temporary Occlusion of Middle Cerebral Artery of Squirrel Monkeys.</b> Thoralf M. Sundt, Jr., and Arthur G. Waltz .....	426
<b>Absence of a Direct Effect of Phosphate or 5'-AMP on the Contractile Protein of Hog Carotid Arteries.</b> Jeremiah T. Herlihy and Richard A. Murphy .....	434
<b>Artificial Atrial Fibrillation in the Dog: An Artifact?</b> Jan Strackee, Adriaan J. Hoelen, Ariaen N. E. Zimmerman, and Frits L. Meijler ....	441
<b>Voltage Dependence and Time Dependence of Contraction in Sheep Cardiac Purkinje Fibers.</b> W. R. Gibbons and H. A. Fozzard .....	446
<b>Contribution of Plastoelasticity to the Tone of the Cat Portal Vein.</b> Robert S. Alexander .....	461
<b>Effects of a Digitalis Glycoside on Coronary and Systemic Dynamics in Conscious Dogs.</b> Stephen F. Vatner, Charles B. Higgins, Dean Franklin, and Eugene Braunwald .....	470
<b>Participation of Central Noradrenergic Neurons in Arterial Baroreceptor Reflexes in the Rabbit.</b> J. P. Chalmers and R. J. Wurtman .....	480
<b>Effects of Intrahypothalamic and Intraventricular Norepinephrine and 5-Hydroxytryptamine on Hypothalamic Blood Flow in the Conscious Rabbit.</b> Clive Rosendorff and William I. Cranston .....	492
<b>Letters to the Editor .....</b>	503
<b>News from the American Heart Association .....</b>	506

## No. 5 (May)

<b>Julius H. Comroe, Jr.—Editor, 1966-1970</b> .....	511
<b>Fibrinolysis during Extracorporeal Circulation: Comparison of the Effects of Disc and Membrane Oxygenators.</b> Henry Ekert, Danielle Montgomery, and Eoin Aberdeen .....	512
<b>Response of Pial Precapillary Vessels to Changes in Arterial Carbon Dioxide Tension.</b> A. Jarrell Raper, Hermes A. Kontos, and John L. Patterson, Jr. ....	518
<b>Extra-Alveolar Vessels and Edema Development in Excised Dog Lungs.</b> Linnette D. Iliff .....	524
<b>Frequency-Force Behavior of In Situ Ventricular Myocardium in the Dog.</b> Frederic Kavalier, Ramon S. Harris, Robert J. Lee, and Vincent J. Fisher .....	533
<b>Effect of Strontium on Transmembrane Potentials of the Rabbit Sino-Atrial Node Deprived of Calcium.</b> Noboru Toda .....	545
<b>Active Changes in Tone in the Canine Vena Cava.</b> Warren G. Guntheroth and Souren Chakmakjian .....	554
<b>Lung Perfusion with Angiotensins I and II: Evidence of Release of Myotropic and Inhibitory Substances.</b> R. K. Türker, M. Yamamoto, F. M. Bumpus, and P. A. Khairallah .....	559
<b>Open-Loop Analysis of the Renin-Angiotensin System in the Dog.</b> A. W. Cowley, Jr., J. P. Miller, and A. C. Guyton .....	568
<b>Effect of Bicycling on the Baroreflex Regulation of Pulse Interval.</b> J. D. Bristow, E. B. Brown, Jr., D. J. C. Cunningham, M. G. Howson, E. Strange Petersen, T. G. Pickering, and P. Sleight .....	582
<b>Geometrical Model of the Microvasculature of Rabbit Omentum from In Vivo Measurements.</b> M. Intaglietta and B. W. Zweifach .....	593
<b>News from the American Heart Association</b> .....	601

## No. 6 (June)

<b>Professor Reflexes Produced by Stimulation of Afferent Cardiac Nerve Fibers in the Cardiac Sympathetic Nerves of the Cat.</b> D. Fred Peterson and Arthur M. Brown .....	605
<b>Comparison of Directly Measured Left Ventricular Wall Stress and Stress Calculated from Geometric Reference Figures.</b> John W. Burns, James W. Covell, Richard Myers, and John Ross, Jr. ....	611
<b>Effects of Hypertension and Its Reversal on the Thoracic Aorta of Male and Female Rats: Morphological and Chemical Studies.</b> Harvey Wolinsky .....	622
<b>Effects of Prostaglandin A<sub>1</sub> on the Systemic and Coronary Circulations in the Conscious Dog.</b> Charles B. Higgins, Stephen F. Vatner, Dean Franklin, Thomas Patrick, and Eugene Braunwald .....	638
<b>Activation of Lipoprotein Lipase: Evaluation of Calcium, Magnesium, and Ammonium as Cofactors.</b> Thomas F. Whyne, Jr., and James M. Felts .....	649

(Continued)

<b>Biphasic Constrictor Response of the Rabbit Ear Artery.</b> John A. Bevan and John G. Waterson .....	655
<b>Modification of the Cardiovascular Effects of L-Dopa in Anesthetized Dogs by Inhibitors of Enzymes Involved in Catecholamine Metabolism.</b> Ronald D. Robson .....	662
<b>DNA Synthesis and Mitoses in Coronary Collateral Vessels of the Dog.</b> Wolfgang Schaper, Marc De Brabander, and Paul Lewi .....	671
<b>Elastic Deformation in Orthotropic Vessels: Theoretical and Experimental Results.</b> Julius Melbin and Abraham Noordergraaf .....	680
<b>Mechanics of the Aorta In Vivo: A Radiographic Approach.</b> J. O. Arndt, H. F. Stegall, and H. J. Wicke .....	693
<b>Effects of Variations in the Strength of Left Ventricular Contraction on Aortic Valve Closure in the Dog.</b> Götz von Bernuth, Anastasios G. Tsakiris, and Earl H. Wood .....	705
<b>Letters to the Editor</b> .....	717
<b>Books Received</b> .....	648
<b>News from the American Heart Association</b> .....	718
<b>Volume Author Index</b> .....	723
<b>Volume Subject Index</b> .....	725

NUMBER 6

INDEX ISSUE

CONTENTS

## EDITORIAL:

- On Block of Something Less Than a Bundle Branch, or of Something More.** Raymond D. Pruitt and Thomas B. Watt, Jr. .... 775

## ORIGINAL ARTICLES:

- Ultrasonic Measurement of Left Ventricular Wall Motion in Acute Myocardial Infarction.** Kiyoshi Inoue, Harold Smulyan, Saktipada Mookherjee, and Robert H. Eich .... 778

- Efficacy of Isoproterenol-Glucagon Infusion in Patients with Heart Disease.** Ralph A. Polumbo, Richard F. Leighton, and Arnold M. Weissler .... 786

- Radioisotopic Angiocardiography. Wide Scope of Applicability in Diagnosis and Evaluation of Therapy in Diseases of the Heart and Great Vessels.** Joseph P. Kriss, Lee P. Enright, William G. Hayden, Lewis Wexler, and Norman E. Shumway .... 792

- Glucose Intolerance in Nonischemic Cardiac Disease. Role of Cardiac Output and Adrenergic Function.** Philip O. Ettinger, Henry A. Oldewurtel, Barry Dzindzio, Virender Sethi, and Timothy J. Regan .... 809

- Effect of Volume Expansion on the Anginal Threshold.** Fareeduddin Khaja, Vijay Sanghvi, Alexander Mark, and John O. Parker .... 824

- Cardiac Conduction in Patients with Symptomatic Sinus Node Disease.** Kenneth M. Rosen, Henry S. Loeb, M. Ziad Sinno, Shahbudin H. Rahimtoola, and Rolf M. Gunnar .... 836

- Renal Vascular Response to Salt Restriction in Normal Man. Evidence Against Adrenergic Mediation.** Norman K. Hollenberg, Douglass F. Adams, Abdur Rashid, Murray Epstein, Herbert L. Abrams, and John P. Merrill .... 845

- Fate of Orally Administered <sup>3</sup>H-Digoxin in Man with Special Reference to the Absorption.** Björn Beermann, Kjell Hellström, and Anders Rosén .... 852

- An In Vitro Model of Paroxysmal Supraventricular Tachycardia.** Andrew L. Wit, Bruce N. Goldreyer, and Anthony N. Damato .... 862

- Hemodynamics of Uremic Anemia.** Martin S. Neff, Kwan E. Kim, Michael Persoff, Gaddo Onesti, and Charles Swartz .... 876

- Maximal Treadmill Stress Test Correlated with Postexercise Phonocardiogram in Normal Subjects.** Wilbert S. Aronow, Nicholas P. Papageorge's, Ronald R. Uyeyama, and John Cassidy .... 884

- Double-Outlet Right Ventricle with Pulmonic Stenosis. Surgical Considerations and Results of Operation.** Manuel M. R. Gomes, William H. Weidman, Dwight C. McGoon, and Gordon K. Danielson .... 889

- Left Heart Volume Estimation in Infancy and Childhood. Reevaluation of Methodology and Normal Values.** Thomas P. Graham, Jr., Jay M. Jarmakani, Ramon V. Canent, Jr., and Mary N. Morrow .... 895

- Digital Systolic Pressures in the Lower Limb in Arterial Disease.** S. A. Carter and J. D. Lezack .... 905

## SPECIAL ARTICLE:

- Rheumatogenic and Nephritogenic Streptococci.** Gene H. Stollerman .... 915

## CLINICOPATHOLOGIC CORRELATIONS:

- Prolapse of Semilunar Cusps as Causes of Aortic Insufficiency.** John B. Carter, Surendra Sethi, Gerald B. Lee, and Jesse E. Edwards .... 922

## RADIOLOGIC NOTES IN CARDIOLOGY:

- Dissecting Aneurysm of the Aorta.** Murray G. Baron .... 933

## SUBJECT INDEX

VOLUME XXVIII

JANUARY-JUNE, 1971

### A

- Acetylcholinesterase**
  - myocardial contraction frequency and onset of cardiac glycoside action, 34
  - propranolol and digitalis action, 109
- Actinomycin-D**
  - effect of oxygen on growth of cultured myocardial cells, 148
- Action potentials**
  - atrial plateau fibers, 62
  - delay, block, and one-way block in depressed Purkinje fibers, 199
  - effect of strontium on transmembrane potentials of rabbit sino-atrial node deprived of calcium, 545
  - function of gating mechanism in A-V conducting system, 136
  - reentry mechanism in canine ventricular tissue, 3
- Actomyosin**
  - effects of phosphate or 5'-AMP on contractile proteins of hog carotid arteries, 434
- Adenosine monophosphate**
  - effects of phosphate or 5'-AMP on arterial actomyosin, 434
- Adenyl cyclase**
  - autonomic control of cardiac C-AMP, 377
  - synergy of propranolol and nicotinic acid on inhibition of plasma free fatty acid release, 270
- Adipose tissue**
  - adrenergic neurohumoral influences on circulation tissue, 389
- Adrenal glands**
  - serum dopamine-beta-hydroxylase activity, 307
- Adrenal medulla**
  - serum dopamine-beta-hydroxylase activity, 307
- Adrenergic factors**
  - frequency-force behavior of in situ ventricular myocardium, 533
- Adrenergic innervation**
  - local norepinephrine and 5-hydroxytryptamine and hypothalamic blood flow, 492
- Adrenergic nerve terminals**
  - effects of 6-hydroxydopamine on canine sinus node, 188
- Adrenergic receptors**

## D

**Decarboxylase inhibition**

cardiovascular effects of L-dopa, 662

**Deformation**

elastic deformation in orthotropic vessels, 671

**Diastolic pressure-volume curve**

structure in chronic dilated canine LV, 49

**Diazoxide**

action on skeletal muscle vascular resistance, 167

**Differentiating circuits**

description of, 503

**Diffusion**

biphasic constrictor response of rabbit ear artery, 655

**Digitalis**

beta-receptor blockade and myocardial effects of glycosides, 109

digoxin and extracellular potassium, 337

effects on coronary and systemic dynamics in conscious dogs, 470

electrode catheter recordings of digitalis-induced bundle-branch ventricular tachycardia, 16, 717

myocardial contraction frequency and onset of cardiac glycoside action, 34

**Digoxin**

influence of extracellular potassium concentration on myocardial uptake and inotropic effect of tritiated digoxin, 337

onset of digitalis action, 34

**Dilatation**

diastolic geometry and sarcomere lengths in chronically dilated canine LV, 49

pulmonary artery, and hilar dance in atrial septal defect, 415

**DL-threo-dihydroxyphenylserine**

cardiovascular effects of L-dopa, 662

**DNA synthesis**

and mitotic activity in coronary collateral vessels of dogs, 671

**Dopamine**

cardiovascular effects of L-dopa in dogs by inhibitors of enzymes involved in catecholamine metabolism, 662

serum dopamine-beta-hydroxylase activity, 307

## E

**Echo beats**

circus movement within AV node as basis for supraventricular tachycardia, 403

**Ectopic automaticity**

effect of strontium on transmembrane potentials of sino-atrial node deprived of calcium, 545

**Edema**

cerebral ischemia and reactive hyperemia, 426

extra-alveolar vessels and edema, development in excised dog lungs, 524

**EDTA**

activation of lipoprotein lipase: evaluation of calcium, magnesium and ammonium as cofactors, 649

converting enzyme activity in human plasma, 246

**Elasticity**

aortic muscle tone and baroreceptor activity, 254

**Elastin**

effects of hypertension and its reversal on thoracic aorta of rats, 622

**Electrical activity**

bundle-branch ventricular tachycardia studied by electrode catheter recordings, 16, 717

disorder in excitation-contraction coupling of cardiac muscle with experimentally produced right ventricular hypertrophy, 346

**Electrocardiography**

arrhythmias simulated by concealed bundle of His extrasystoles in dogs, 316

synchronization in isorhythmic A-V dissociation: computer model, 23

**Electrode catheter recordings**

bundle-branch ventricular tachycardia, 16, 717

**Electrograms**

arrhythmias simulated by concealed bundle of His extrasystoles in the dog, 316

bundle branch-ventricular tachycardia, 16, 717

circus movement within AV node as basis for supraventricular tachycardia, 403

**Electromagnetic flowmeters**

effects of variations in strength of LV contraction on aortic valve closure in dogs, 705

**Electronus in heart muscle**

reentry mechanism in canine ventricular tissue, 3

**Electrophysiology**

canine atrial plateau fibers, 62

**Enzymes**

activation of lipoprotein lipase: evaluation of calcium, magnesium, and ammonium as cofactors, 649

cardiovascular effects of L-dopa in dogs by inhibitors of enzymes involved in catecholamine metabolism, 662

converting enzyme activity in human plasma, 246

**Euglobulin lysis time**

fibrinolysis during extracorporeal circulation, 512

**Excitability**

atrial plateau fibers, 62

re-entry in Purkinje fibers, 220

**Excitation-contraction coupling**

autonomic control of cardiac C-AMP, 377

contraction in Purkinje fibers, 446

disorder in cardiac muscle from cats with experimentally produced right ventricular hypertrophy, 346

**Excretion rates**

norepinephrine excretion in hypertension, 84

**Exercise**

effect of bicycling on baroreflex regulation of pulse interval, 582

in vivo studies of vena cava, 554

**Extracellular space**

THAM and tolerance of heart to carbon dioxide, 74

**Extrasystoles**

arrhythmias simulated by concealed bundle of His extrasystoles in dogs, 316

delay, block, and one-way block in depressed Purkinje fibers, 199

## F

**Fatty acids. See Free fatty acids****Fibers**

electrophysiological characteristics of canine atrial plateau fibers, 62

**Fibrillation**

atrial

artificial atrial fibrillation in dogs, 441

delay, block, and one-way block in depressed Purkinje fibers, 199

re-entry in Purkinje fibers, 220

ventricular

atrial transmural pressures during experimental pericardial tamponade, 323

responses of pial precapillary vessels to changes in arterial carbon dioxide tension, 518
- Hypodynamicity**  
onset of digitalis action, 34
- Hypotension**  
cardiovascular effects of L-dopa, 662  
effects of prostaglandin A<sub>1</sub> on systemic and coronary circulations in dogs, 638
- Hypothalamus**  
effect of local norepinephrine, 5-hydroxytryptamine and hypothalamic blood flow, 492  
participation of central noradrenergic neurons in arterial baroreceptor reflexes, 480
- Hypovolemia**  
atrial transmural pressures during cardiac tamponade, 323
- Hypoxia**  
effect of oxygen on growth of cultured myocardial cells, 148  
effects on pulmonary vascular reactivity after pneumonectomy, 397

## I

- Immunosympathectomy**  
effect on development of high blood pressure in genetic hypertension, 330
- Impedance matching**  
Fourier analysis of LV performance, 119
- Impulse conduction**  
delay, block, and one-way block in depressed Purkinje fibers, 199  
summation and inhibition, 220
- Impulse formation**  
bundle-branch ventricular tachycardia, 16  
premature, function of gating mechanism in A-V conducting system, 136
- Impulse propagation**  
arrhythmias simulated by concealed bundle of His extrasystoles in dogs, 316
- Indicator-dilution techniques**  
convection-diffusion model of indicator transport through an organ, 503  
effects of intrahypothalamic and intraventricular norepinephrine and 5-hydroxytryptamine on hypothalamic blood flow in rabbits, 492
- Indoleamines**  
local norepinephrine and 5-hydroxytryptamine and hypothalamic blood flow, 492
- Inhibition**  
conduction of cardiac impulse; re-entry in Purkinje fibers, 220  
lung perfusion with angiotensins I and II, 559
- Inotropic action**  
myocardial contraction frequency and onset of cardiac glycoside action, 34
- Inotropic concentration-effect curves**  
propranolol and digitalis action, 109
- Inotropic effects**  
action of THAM on negative inotropic effect of carbon dioxide, 74
- Interval-strength relationship**  
onset of digitalis action, 35
- Ischemia**  
cerebral ischemia and reactive hyperemia: studies of cortical blood flow and microcirculation before and after occlusion of cerebral artery, 426  
delay, block, and one-way block in depressed Purkinje fibers, 199  
distribution of radioactive microspheres in canine LV, 263

- DNA synthesis and mitoses in coronary collateral vessels of the dog, 671
- Isolated heart muscle**  
beta-receptor blockade and myocardial effects of cardiac glycosides, 109
- Isometric tension**  
digoxin and extracellular potassium, 337
- Isoproterenol**  
effect of changes in tone in vena cava, 554  
Fourier analysis of ventricular activity, 119

## K

- Kidneys**  
causes for the secretion of renin, 301  
microsphere measurement of intrarenal blood flow distribution, 158  
open-loop analysis of renin-angiotensin system in dogs, 568
- Kinetic energy**  
Fourier analysis of ventricular activity, 119
- Krypton**  
cerebral ischemia and reactive hyperemia, 426

## L

- Lactic dehydrogenase**  
rat cardiac muscle in experimental hypertrophy, 234
- L-Dopa**  
cardiovascular effects in dogs by inhibitors of enzymes involved in catecholamine metabolism, 662  
norepinephrine excretion in hypertension, 84
- Left bundle-branch potentials**  
bundle-branch ventricular tachycardia studied by electrode catheter recordings, 16, 717
- Left ventricle**  
diastolic geometry and sarcomere lengths in the chronically dilated canine LV, 49  
effects of variations in strength of LV contraction on aortic valve closure, 705  
Fourier analysis of performance: evaluation of impedance matching, 119
- Lipid synthesis**  
synergy of propranolol and nicotinic acid on plasma free fatty acid, 270
- Lipolysis**  
activation of lipoprotein lipase, 649
- Lipoprotein lipase**  
activation of: evaluation of calcium, magnesium and ammonium as cofactors, 649
- Lipoproteins**  
synergy of propranolol and nicotinic acid on plasma free fatty acid, 270
- Logarithmic amplifier**  
new technique for determining instantaneous myocardial force-velocity relations, 290
- Lungs**  
blood hyperosmolality and pulmonary vascular resistance in the cat, 371  
effects of hypoxia on pulmonary vascular reactivity in pneumonectomized puppies and minipigs, 397  
extra-alveolar vessels and edema development in excised dog lungs, 524  
perfusion with angiotensins I and II: evidence of release of myotropic and inhibitory substances, 559
- "Luxury-perfusion" syndrome**  
cerebral ischemia and reactive hyperemia, 426

## M

- Macula densa theory**  
of renin release, 301
- Magnesium**  
cofactor function in lipoprotein lipase activity, 649
- Marfan's syndrome**  
pulmonary artery dilatation and hilar dance in atrial septal defect, 415
- Measurements**  
elastic deformation in orthotropic vessels, 671  
microsphere measurement on intrarenal circulation in the dog, 158
- Media**  
neurogenic vasoconstriction, 179
- Mesenteric arteries**  
immunosympathectomy and genetic hypertension, 330
- Metabolism**  
action of diazoxide on skeletal muscle vascular resistance, 167
- Microcirculation**  
geometrical model of microvasculature of rabbit omentum from in vivo measurements, 593
- Microspheres**  
effect of ischemia and antianginal drugs on distribution of radioactive microspheres, 263  
measurement of intrarenal circulation in the dog, 158
- Models**  
computer  
isorhythmic dissociation, 23  
convection-diffusion model of indicator transport through an organ, 503  
of microvasculature of rabbit omentum from in vivo measurements, 593
- Monoamine oxidase**  
cardiovascular effects of L-dopa, 662
- Morphological studies**  
effects of hypertension and its reversal on thoracic aorta of rats, 622
- Muscles**  
action of diazoxide on vascular resistance, 167  
autonomic control of cardiac C-AMP, 377  
biphasic constrictor response of rabbit ear artery, 655  
contraction in Purkinje fibers, 446  
contribution of plastoelasticity to tone of cat portal vein, 461  
mechanical properties during experimental hypertrophy, 234  
rat cardiac muscle in experimental hypertrophy, 234  
smooth  
aortic muscle tone and baroreceptor activity, 254  
blood hyperosmolality and pulmonary vascular resistance, 371  
effects of phosphate or 5'-AMP on arterial actomyosin, 434  
neurogenic vasoconstriction, 179
- Myocardium**  
automaticity  
propranolol and digitalis action, 109  
contractility  
digoxin and extracellular potassium, 337  
excitation-contraction coupling, 346  
frequency and onset of cardiac glycoside action, 34  
frequency-force behavior of in situ ventricular myocardium, 533

- new technique for determining instantaneous myocardial force-velocity relations, 290  
THAM and tolerance of heart to carbon dioxide, 74  
frequency-force behavior of in situ ventricular myocardium in the dog, 533  
ischemia  
delay, block, and one-way block in depressed Purkinje fibers, 199  
*See also Ischemia*
- Myofibrils**  
diastolic geometry and sarcomere lengths in chronically dilated canine LV, 49  
effects of phosphate or 5'-AMP on arterial actomyosin, 434
- Myotropic factors**  
lung perfusion with angiotensins I and II, 559

## N

- Nerve stimulation**  
distribution theory of resistance of neurogenic vasoconstriction to alpha-receptor blockade, 179
- Nervous system**  
effects of immunosympathectomy and genetic hypertension, 330
- Neuroeffector distance**  
neurogenic vasoconstriction, 179
- Neurogenic response**  
biphasic constrictor response of rabbit ear artery, 655
- Neurogenic vasoconstriction**  
distribution theory of resistance of, to alpha-receptor blockade, 179
- Nicotinic acid**  
synergistic effects on plasma free fatty acid, 270
- Nitroglycerin**  
distribution of radioactive microspheres, 263
- Noradrenergic neurons**  
participation of central noradrenergic neurons in arterial baroreceptor reflexes, 480
- Norepinephrine**  
action of diazoxide on muscle vascular resistance, 167  
active changes in tone in canine vena cava, 554  
adrenergic neurohumoral influences on circulation and lipolysis in omental adipose tissue, 389  
aortic mechanics in vivo, 693  
aortic muscle tone and baroreceptor activity, 254  
autonomic control of cardiac C-AMP, 377  
beta-receptor blockade and myocardial effects of cardiac glycosides, 109  
biphasic constrictor response of rabbit ear artery, 655  
cardiovascular effects of L-dopa, 662  
effect of strontium on transmembrane potentials of sino-atrial node deprived of calcium, 545  
effects of intrahypothalamic and intraventricular norepinephrine and 5-hydroxytryptamine and hypothalamic blood flow, 492  
effects of 6-hydroxydopamine on canine sinus node, 188  
evaluation of increased excretion in hypertension, 84  
Fourier analysis of ventricular activity, 119  
immunosympathectomy and genetic hypertension, 330  
neurogenic vasoconstriction, 179

- participation of central noradrenergic neurons in arterial baroreceptor reflexes, 480
- serum dopamine-beta-hydroxylase activity, 307
- synergy of propranolol and nicotinic acid on plasma free fatty acid, 270

**O**

- Occlusions**
  - cerebral ischemia and reactive hyperemia, 426
  - coronary artery, distribution of radioactive microspheres, 263
- Omentum**
  - adrenergic neurohumoral influences on circulation and lipolysis in canine omental adipose tissue, 389
  - geometrical model of microvasculature of rabbit omentum from in vivo measurements, 593
- Osmolarity**
  - THAM and tolerance of heart to carbon dioxide, 74
- Ouabain**
  - effects of digitalis glycoside on coronary and systemic dynamics in conscious dogs, 470
  - onset of digitalis action, 34

AMERICAN HEART ASSOCIATION, INC.

# Circulation Research

## An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

# **Circulation Research**

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

## **Volume XXIX**

July-December

1971

### **No. 1 (July)**

<b>Hereditary Patent Ductus Arteriosus and Its Sequelae in the Dog.</b> D. F. Patterson, R. L. Pyle, J. W. Buchanan, E. Trautvetter, and D. A. Abt .....	1
<b>Sarcolemmal and Sarcoplasmic Reticular ATPase Activities in the Failing Canine Heart.</b> Richard J. Mead, Myron B. Peterson, and Joseph D. Welty .....	14
<b>Relationship of Extraluminal Tubular Deposition of Ferrocyanide to Peritubular Perfusion Rate in Cortical and Medullary Nephron Segments of the Rat Kidney.</b> J. B. Coelho, K. C. H. Chien, S. R. Stella, and S. E. Bradley .....	21
<b>Experimental Studies on the Facilitation of AV Conduction by Ectopic Beats in Dogs and Rabbits.</b> E. Neil Moore and Joseph F. Spear .....	29
<b>Compliance of the Human Pulmonary Arterial System in Disease.</b> Stuart R. Reuben .....	40
<b>Experimental Renal Hypertension in Dogs: Forelimb Hemodynamics.</b> Henry W. Overbeck, Booker T. Swindall, Daniel F. Cowan, and Michael C. Fleck .....	51
<b>Velocity of Shortening of Unloaded Heart Muscle and the Length-Tension Relation.</b> Dirk L. Brutsaert, Victor A. Claes, and Edmund H. Sonnenblick .....	63
<b>Monoexponential Extrapolation of Tracer Clearance Curves in Kinetic Analysis.</b> Niels A. Lassen and Per Sejrnsen .....	76
<b>Glucagon in Prevention and Abolition of Ouabain-Induced Ventricular Tachycardia in Normokalemic and Hypokalemic Dogs.</b> Stanley Einzig, Edward P. Todd, Demetre M. Nicoloff, and Russell V. Lucas, Jr. ....	88
<b>Effects of Reduced Hematocrit on Erythrocyte Velocity and Fluorescein Transit Time in the Cerebral Microcirculation of the Mouse.</b> William I. Rosenblum .....	96
<b>Letters to the Editor</b> .....	104
<b>Instructions to Authors</b> .....	110
<b>News from the American Heart Association</b> .....	114

### **No. 2 (August)**

<b>Reflex Effects of Stimulation of Carotid Sinus and Aortic Baroreceptors on Hindlimb Vascular Resistance in Dogs.</b> Roger A. L. Dampney, Michael G. Taylor, and Elspeth M. McLachlan .....	119
<b>Intrarenal Hemodynamics in Glycerol-Induced Myohemoglobinuric Acute Renal Failure in the Rat.</b> G. Ayer, A. Grandchamp, T. Wyler, and B. Truniger .....	128

(Continued)

<b>Effect of Low Frequency Vibration on the Arterial Wall.</b> Derek R. Boughner and Margot R. Roach .....	136
<b>Reflex Apnea, Bradycardia, and Hypotension Produced by Serotonin and Phenylidguanide Acting on the Nodose Ganglia of the Cat.</b> Louise Jacobs and Julius H. Comroe, Jr. ....	145
<b>Excitation Sequences of the Atrial Septum and the AV Node in Isolated Hearts of the Dog and Rabbit.</b> Madison S. Spach, Melvyn Lieberman, John G. Scott, Roger C. Barr, E. A. Johnson, and J. Mailen Kootsey ....	156
<b>A Theory for the Quantification of Transcapillary Exchange in the Presence of Shunt Flow.</b> Shu Chien .....	173
<b>Transcapillary Exchange in the Working Left Ventricle of the Dog.</b> Wilfred H. Ziegler and Carl A. Goresky .....	181
<b>Kinetics of Rubidium Uptake in the Working Dog Heart.</b> Wilfred H. Ziegler and Carl A. Goresky .....	208
<b>News from the American Heart Association</b> .....	221

## No. 3. (September)

<b>Dynamic Changes in Splanchnic Blood Flow and Blood Volume in Dogs during Activation of Sympathetic Nerves.</b> Gerald A. Brooksby and David E. Donald .....	227
<b>Effects of Cyclic AMP, Sympathomimetic Amines, and Adrenergic Receptor Antagonists on Renin Secretion.</b> Nathaniel Winer, Deenbandhu S. Chokshi, and Walter G. Walkenhorst .....	239
<b>Criteria for the Onset of Vascular Murmurs.</b> Alvin H. Sacks, E. Glenn Tickner, and Ian B. Macdonald .....	249
<b>Intracortical Distribution of Renal Blood Flow in Hemorrhagic Shock in Dogs.</b> Alexander Logan, Pedro Jose, Gilbert Eisner, Lawrence Lilienfeld, and Lawrence Slotkoff .....	257
<b>Diastolic Pressure-Volume Relationship in the Canine Left Ventricle.</b> George Diamond, James S. Forrester, James Hargis, William W. Parnley, Ronald Danzig, and H. J. C. Swan .....	267
<b>Development of Complement-Fixing 19S, Anti-Heart Mitochondria Autoantibody, Following Myocardial Infarction in Dogs.</b> R. Neal Pinckard, Merle S. Olson, Robert A. O'Rourke, John D. Palmer, Robert E. Kelley, and Samuel Goldfein .....	276
<b>Effect of Altering Potassium Concentration on the Action of Lidocaine and Diphenylhydantoin on Rabbit Atrial and Ventricular Muscle.</b> B. N. Singh and E. M. Vaughan Williams .....	286
<b>The Two Components of the Human Atrial Action Potential.</b> Alexandre Fabiato and Françoise Fabiato .....	296
<b>Observations on Factors Affecting Local Forces in the Left Ventricular Wall during Acute Myocardial Ischemia.</b> Heinrich R. Schelbert, James W. Covell, John W. Burns, Peter R. Maroko, and John Ross, Jr. ....	306
<b>News from the American Heart Association</b> .....	317

## No. 4 (October)

<b>Histamine and Interstitial Pulmonary Edema in the Dog.</b> G. G. Pietra, J. P. Szidon, M. M. Leventhal, and A. P. Fishman .....	323
--	-----

(Continued)

<b>Significance of Splanchnic Proteases in the Production of a Toxic Factor in Hemorrhagic Shock.</b> Thomas M. Glenn and Allan M. Lefer .....	338
<b>Muscle Cholinergic Dilators in the Sinus Baroreceptor Response in Cats.</b> Toru Takeuchi and John W. Manning .....	350
<b>Isolation from Rat Diaphragm of a Calcium-Protein Complex Involved in Excitation-Contraction Coupling.</b> Stephen Hajdu, Christian J. Posner, and Edward J. Leonard .....	358
<b>Effects of Bradykinin and Autonomic Nervous System Inhibition on Systemic and Regional Hemodynamics in the Unanesthetized Rhesus Monkey.</b> Michael J. Reichgott, Ralph P. Forsyth, and Kenneth L. Melmon .....	367
<b>Role of Adenine Nucleotides, Adenosine, and Inorganic Phosphate in the Regulation of Skeletal Muscle Blood Flow.</b> James G. Dobson, Jr., Rafael Rubio, and Robert M. Berne .....	375
<b>On Defining the Pulmonary Extravascular Water Volume.</b> Kenneth L. Brigham, Lloyd H. Ramsey, James D. Snell, and Cullen R. Merritt, III ..	385
<b>Intrarenal Conversion of Angiotensin I to Angiotensin II in the Dog.</b> Joseph Di Salvo, Aron Peterson, Cheryl Montefusco, and Margaret Menta ..	398
<b>Determination of the True Phase Velocity of Arterial Pressure Waves in Vivo.</b> Robert H. Cox .....	407
<b>Absorption and Transport of Digitoxin in the Dog.</b> G. Charles Oliver, John Cooksey, Charles Witte, and Marlys Witte .....	419
<b>Effect of Age and High Blood Pressure on Baroreflex Sensitivity in Man.</b> Brian Gribbin, Thomas G. Pickering, Peter Sleight, and Richard Peto ..	424
<b>News from the American Heart Association</b> .....	432

## No. 5 (November)

<b>Brief Reviews: Sympathetic-Parasympathetic Interactions in the Heart.</b> Matthew N. Levy .....	437
<b>A Plasma Humoral Factor of Extrarenal Origin Causing Release of Reninlike Activity in Hypotensive Dogs.</b> E. De Vito, C. Wilson, R. E. Shipley, R. P. Miller, and B. L. Martz .....	446
<b>Effects on the Canine P Wave of Discrete Lesions in the Specialized Atrial Tracts.</b> Albert L. Waldo, Harry L. Bush, Jr., Henry Gelband, George L. Zorn, Jr., Kari J. Vitikainen, and Brian F. Hoffman .....	452
<b>Activation of Phosphorylase by Cyclic AMP without Augmentation of Contractility in the Perfused Guinea Pig Heart.</b> John K. Kjekshus, Philip D. Henry, and Burton E. Sobel .....	468
<b>Factors Involved in the Antinatriuretic Effects of Acute Constriction of the Thoracic and Abdominal Inferior Vena Cava.</b> Robert W. Schrier and Michael H. Humphreys .....	479
<b>Role of Cardiac Output and the Autonomic Nervous System in the Antinatriuretic Response to Acute Constriction of the Thoracic Superior Vena Cava.</b> Robert W. Schrier, Michael H. Humphreys, and Robert C. Ufferman .....	490
<b>Collision of Excitation Waves in the Dog Purkinje System: Extracellular Identification.</b> Madison S. Spach, Roger C. Barr, Gerald S. Serwer, Edward A. Johnson, and J. Mailen Kootsey .....	499

(Continued)

<b>Studies of the Equivalent Cardiac Generator Behavior of Isolated Turtle Hearts.</b> Daniel A. Brody, Otis S. Warr, III, James R. Wennemark, John W. Cox, Jr., Francis W. Keller, and Fred H. Terry .....	512
<b>Influence of Sodium and Potassium Content on Arterial Responsiveness.</b> Thomas F. Burks, Charles T. Spalding, and Vernon D. Jones .....	525
<b>Suprapontine Contributions to the Carotid Sinus Reflex in the Cat.</b> Barbara B. Kent, J. Wanzer Drane, and John W. Manning .....	534
<b>Repair in Arterial Tissue: Morphological and Biochemical Changes in Rabbit Aorta after a Single Dilatation Injury.</b> P. Helin, I. Lorenzen, C. Garbarsch, and M. E. Matthiessen .....	542
<b>Sympathetic Control of Pulmonary Vascular Impedance in Anesthetized Dogs.</b> John B. Pace .....	555
<b>Effect of Interaction of the Hypothalamus and the Carotid Sinus Mechanoreceptor System on Renal Hemodynamics in the Anesthetized Dog.</b> Roger J. Bagshaw, Masahiko Iizuka, and Lysle H. Peterson ..	569
<b>Letters to the Editor</b> .....	586
<b>News from the American Heart Association</b> .....	587

#### No. 6 (December)

<b>Pulmonary Vascular Response to Exercise in the Dog.</b> Ronald C. Elkins and William R. Milnor .....	591
<b>Effects of Body Surface Boundary and of Tissue Inhomogeneity on the Electrocardiogram of the Dog.</b> Allen M. Scher, Winfried W. Ohm, Wallace G. L. Kerrick, Steven M. Lewis, and Allan C. Young .....	600
<b>A Noninvasive Technique for the Determination of Velocity of Circumferential Fiber Shortening in Man.</b> John A. Paraskos, William Grossman, Stephen Saltz, James E. Dalen, and Lewis Dexter .....	610
<b>Glucagon-Enhanced Ventricular Automaticity in Dogs: Its Concealment by Positive Chronotropism.</b> R. D. Wilkerson, J. K. Pruett, and E. F. Woods .....	616
<b>Circulatory Reflex from Vagal Afferents in Response to Hemorrhage in the Dog.</b> Conrad L. Pelletier, Anthony J. Edis, and John T. Shepherd .....	626
<b>Correlation of the Electrical and Mechanical Changes in the Dog Heart during Progressive Digitalization.</b> M. Klein, N. S. Nejad, B. Lown, F. Hagemeyer, and I. Barr .....	635
<b>Effects of Catecholamines and Renal Nerve Stimulation on Renin Release in the Nonfiltering Kidney.</b> J. Alan Johnson, James O. Davis, and Robert T. Witty .....	646
<b>Role of the Renin-Angiotensin System in the Pathogenesis of Severe Hypertension in Rats.</b> O. A. Carretero, P. Kuk, S. Piwonska, J. A. Houle, and M. Marin-Grez .....	654
<b>A Specific Competitive Antagonist of the Vascular Action of Angiotensin II.</b> Donald T. Pals, Frederick D. Masucci, Frank Sipos, and George S. Denning, Jr. ....	664
<b>Role of the Pressor Action of Angiotensin II in Experimental Hypertension.</b> Donald T. Pals, Frederick D. Masucci, George S. Denning, Jr., Frank Sipos, and Dyrall C. Fessler .....	673

(Continued)

<b>Mechanism of Pulmonary Conversion of Angiotensin I to Angiotensin II in the Dog.</b> Suzanne Oparil, Geoffrey W. Tregear, Terry Koerner, Benjamin A. Barnes, and Edgar Haber .....	682
<b>Changes in Forelimb Weight and Segmental Vascular Resistances Following Severe Hemorrhage.</b> George J. Grega, James M. Schwinghamer, and Francis J. Haddy .....	691
<b>Effect of an Early Atrial Premature Beat on Activity of the Sinoatrial Node and Atrial Rhythm in the Rabbit.</b> Felix I. M. Bonke, Lennart N. Bouman, and Francien J. G. Schopman .....	704
<b>Letters to the Editor</b> .....	716
<b>Books Received</b> .....	599
<b>Acknowledgment to Reviewers</b> .....	719
<b>News from the American Heart Association</b> .....	721
<b>Volume Author Index</b> .....	725
<b>Volume Subject Index</b> .....	727
<b>Supplement Author Index</b> .....	S-VII
<b>Supplement Subject Index</b> .....	S-IX

## SUBJECT INDEX

VOLUME XXIX

JULY-DECEMBER, 1971

### A

- Accentuated antagonism**  
sympathetic-parasympathetic interactions in the heart, 437
- Acetyl strophanthidin**  
effects of digitalization, 635
- Action potentials**  
collision of excitation waves in dog Purkinje system, 499  
determination of electrical sources in mammalian heart from intracellular action potentials, 106  
facilitated AV conduction, 29  
two components of human atrial action potential, 296
- Adenine nucleotides**  
cyclic AMP and myocardial contractility, 468  
role in regulation of skeletal muscle blood flow, 375
- Adenosine**  
role of adenine nucleotides, inorganic phosphate and, in regulation of muscle blood flow, 375
- Adenosine 3',5'-monophosphate.** *See* Cyclic AMP
- Adenyl cyclase**  
intracellular mediation of renin secretion, 239
- Adrenergic blockade**  
muscle cholinergic dilators in sinus baroreceptor response in cats, 350
- Age**  
effect on age, and high blood pressure on baroreflex sensitivity, 424
- Anemia**  
cerebral microcirculation and, 96
- Angiotensin**  
humoral renin-releasing factor, 446  
role of renin-angiotensin system in pathogenesis of severe hypertension in rats, 654
- Angiotensin I**  
renal conversion to angiotensin II in dogs, 398
- Angiotensin II**  
mechanism of pulmonary conversion of angiotensin I to angiotensin II in dogs, 682  
role of pressor action of, in experimental hypertension, 673  
specific competitive antagonist of the vascular action of, 664
- Animal studies**  
**cats**  
maximum shortening velocity of heart, 63  
monoexponential extrapolation of tracer clearance curves in kinetic analysis, 76  
muscle cholinergic dilators in sinus baroreceptor responses, 350  
reflexes from nodose ganglia, 145  
splanchnic proteases in hemorrhagic shock, 338  
supramedullary participation in carotid sinus reflex, 834  
**dogs**  
absorption and transport of digitoxin, 419  
adenosine and muscle blood flow, 375  
antinatriuretic effects of acute constriction of inferior vena cava, 479  
antinatriuretic effect of acute constriction of thoracic superior vena cava, 490  
ATPase activity in failing canine heart, 14  
changes in forelimb weight and segmental vascular resistances following severe hemorrhage, 691  
changes in splanchnic blood flow and blood volume, 227  
circulatory reflex from vagal afferents in response to hemorrhage in dogs, 626  
collision of excitation waves in Purkinje system: extracellular identification, 499  
comparison of carotid and sinus reflexes, 119  
criteria for onset of vascular murmurs, 249  
development of anti-heart autoantibody following MI, 276  
diastolic pressure-volume relationships in LV, 267  
effects of catecholamines and renal nerve stimulation on renin release, 646  
effects of digitalization, 635  
effects on P wave of discrete lesions in specialized atrial tracts, 452  
ECG and thoracic conductivity, 600  
excitation sequence of atrial septum and AV node in isolated hearts of dogs and rabbits, 156, 716  
facilitated AV conduction, 29  
factors affecting local forces in LV wall during acute myocardial ischemia, 306  
glucagon and ventricular automaticity in dogs, 616  
glucagon in prevention and abolition of ventricular tachycardia in dogs, 88  
hereditary patent ductus arteriosus, 1  
histamine and interstitial pulmonary edema, 323  
humoral renin-releasing factor in hypotensive dogs, 446  
influence of sodium and potassium content on arterial responsiveness, 525  
intracellular mediation of renin secretion, 239  
intracortical distribution of renal blood flow, 257  
mechanism of pulmonary conversion of angiotensin I to angiotensin II, 682  
phase velocity of arterial pressure waves in vivo, 407  
pulmonary vascular response to exercise, 591

- monoexponential extrapolation of tracer clearance curves in kinetic analysis, 76

**Murmurs**

- criteria for onset of vascular murmurs, 249
- effect of low frequency vibration on arterial wall, 136

**Muscles**

- cholinergic dilators in sinus baroreceptor response in cats, 350
- maximum shortening velocity, 63
- skeletal
  - changes in forelimb weight and segmental vascular resistances following severe hemorrhage, 691
  - role of adenine nucleotides, adenosine, and inorganic phosphate in regulation of blood flow, 375
  - velocity of circumferential fiber shortening, 610

**Myocardial infarction**

- development of anti-heart mitochondria autoantibody following MI, 276
- factors affecting local forces in LV wall during acute myocardial ischemia, 306

**Myocardial ischemia**

- autoantibody following MI in dogs, 276
- factors affecting local forces in LV wall during acute myocardial ischemia, 306

**Myocardium**

- beta receptor blockade and myocardial effects of cardiac glycosides, 104
- contractility
  - ATPase activity in failing canine heart, 14
  - cyclic AMP and, 468
  - velocity of circumferential fiber shortening, 610
- depressant factor
  - lysosomal proteases in hemorrhagic shock, 338
- maximum shortening velocity, 63, 610

**Myohemoglobinuria**

- intrarenal hemodynamics in acute renal failure, 128

## N

**Na<sup>+</sup>-K<sup>+</sup> ATPase**

- ATPase activity in failing canine heart, 14

**Nephrectomy**

- role of renin-angiotensin system in pathogenesis of severe hypertension in rats, 654

**Nephrons**

- relationship of ferrocyanide to peritubular perfusion rate in nephron segments of rat kidney, 21

**Nervous system**

- autonomic
  - antinatriuresis and acute constriction of thoracic superior vena cava, 490
  - supramedullary participation in carotid sinus reflex, 534
- sympathetic
  - control of pulmonary vascular impedance, 555
  - effect of hypothalamus-carotid sinus interaction on renal hemodynamics in dogs, 569
  - sympathetic-parasympathetic interactions in the heart, 437

**19S class of immunoglobulin**

- autoantibody following MI in dogs, 276

**Nodose ganglia**

- reflex apnea, bradycardia, and hypotension produced by serotonin and phenylguanide acting on, 145

- Noninvasive technique**  
velocity of circumferential fiber shortening, 610
- Norepinephrine**  
beta receptor blockade and myocardial effects of cardiac glycosides, 104  
effects on renin release, 646  
influence of sodium and potassium content on arterial responsiveness, 525  
intracellular mediation of renin secretion, 239  
question of norepinephrine release in action of cardiac glycosides, 104
- Nucleotides**  
intracellular mediation of renin secretion, 239

## O

- Occlusions**  
coronary  
factors affecting local forces in LV wall during acute myocardial ischemia, 306
- Oliguria**  
intrarenal hemodynamics in acute renal failure, 128
- Open-loop analysis**  
hypothalamus-carotid sinus interaction, 569
- Orifice plates**  
criteria for onset of vascular murmurs, 249
- Ouabain**  
ATPase activity in failing canine heart, 14  
effects of digitalization, 635  
glucagon in prevention and abolition of ouabain-induced ventricular tachycardia, 88
- Outflow detection**  
monoexponential extrapolation of tracer clearance curves in kinetic analysis, 76
- Overdrive suppression**  
glucagon and ventricular automaticity, 616

## P

- P wave**  
effects of discrete lesions in specialized atrial tracts, 452
- Pacemakers**  
postextrasystolic acceleration, 704
- Pancreas**  
lysosomal proteases in hemorrhagic shock, 338
- Papaverine**  
effects on renin release, 646
- Papillary muscle**  
maximum shortening velocity of heart, 63
- Patent ductus arteriosus**  
hereditary PDA in the dog, 1
- Pathology**  
hemodynamics of renal hypertension, 51
- Peak isovolumic ( $dP/dt$ )/P**  
effects of digitalization, 635
- Peptide synthesis**  
angiotension II antagonist, 664  
mechanism of pulmonary conversion of angiotension I to angiotension II in dogs, 682  
role of pressor action of angiotension II in experimental hypertension, 673
- Peripheral circulation**  
circulatory reflex from vagal afferents in response to hemorrhage in dogs, 626
- Peripheral vascular resistance**  
adenosine and muscle blood flow, 375  
effects of bradykinin and autonomic reflexes, 367
- Peritubular capillaries**  
ferrocyanide and peritubular perfusion, 21

- Permeability**  
histamine and interstitial pulmonary edema in dogs, 323  
human atrial action potential, 296
- Phentolamine**  
intracellular mediation of renin secretion, 239
- Phenyldiguanide**  
reflex apnea, bradycardia and hypotension produced by serotonin and, acting on nodose ganglia of cats, 145
- Phenylephrine**  
age, high blood pressure and baroreflex sensitivity, 424
- Phosphate**  
role of adenine nucleotides, adenosine, and inorganic phosphate in regulation of muscle blood flow, 375
- Phosphorylase**  
cyclic AMP and myocardial contractility, 468
- Plasma**  
anemia and cerebral microcirculation, 96  
humoral renin-releasing factor in hypotensive dogs, 446
- Plasma renin levels**  
severe hypertension, 654
- Plethysmography**  
pulmonary arterial compliance in disease, 40
- Poiseuille flow**  
monoexponential extrapolation of tracer clearance curves in kinetic analysis, 76
- Portal vein**  
absorption and transport of digitoxin, 419
- Postextrasystolic arrhythmia**  
effect of early atrial premature beat on SA node and atrial rhythm in rabbits, 704
- Potassium**  
effect of altering potassium concentration on action of lidocaine and diphenylhydantoin on rabbit atrial and ventricular muscle, 286  
glucagon in prevention and abolition of ouabain-induced ventricular tachycardia in normokalemic and hypokalemic dogs, 88  
influence of sodium and potassium content on arterial responsiveness, 525
- Potentials**  
ECG and thoracic conductivity, 600
- Premature beats**  
effect of early atrial premature beat on activity of sinoatrial node and atrial rhythm in rabbits, 704
- Premature impulses**  
collision of excitation waves in dog Purkinje system, 499  
facilitated AV conduction, 29
- Pressure gradients**  
hemodynamics of renal hypertension, 51
- Pressure volume relationships**  
diastolic pressure-volume relationships in canine LV, 267
- Pressures**  
arterial and venous, changes in forelimb weight and segmental vascular resistances following severe hemorrhage, 691  
determination of true phase velocity of arterial pressure waves in vivo, 407  
peak isovolumic ( $dP/dt$ )/P  
effects of digitalization, 635  
pulmonary vascular response to exercise in dogs, 591
- Procaine**  
calcium-protein complex of excitation-contraction coupling, 358

**Propranolol**

- beta receptor blockade and myocardial effects of cardiac glycosides, 104
- glucagon-enhanced ventricular automaticity in dogs, 616
- intracellular mediation of renin secretion, 239
- sympathetic control of pulmonary vascular impedance in dogs, 555

**Proteins**

- calcium-protein complex in excitation-contraction coupling, 358

**Pulmonary artery**

- compliance of pulmonary arterial system in disease, 40

**stenosis**

- ATPase activity in failing canine heart, 14
- sympathetic control of pulmonary vascular impedance in dogs, 555

**Pulmonary circulation**

- mechanism of pulmonary conversion of angiotensin I to angiotensin II in the dog, 682
- pulmonary vascular response to exercise in dogs, 591

**Pulmonary edema**

- defining pulmonary extravascular water volume, 385
- histamine and interstitial pulmonary edema in dogs, 323

**Pulmonary extravascular water**

- defining and measuring volume, 385

**Pulmonary vascular response**

- to exercise in dogs, 591
- sympathetic control of pulmonary vascular impedance in dogs, 555

**Pulse interval**

- age, high blood pressure and baroreflex sensitivity, 424

**Pulse wave velocity**

- phase velocity of arterial pressure waves in vivo, 407

**Purkinje system**

- collision of excitation waves, 499

**R****Radioisotope tracers**

- absorption and transport of digitoxin in dogs, 419
- defining pulmonary extravascular water volume, 385
- histamine and interstitial pulmonary edema in dogs, 323
- monoexponential extrapolation of tracer clearance curves in kinetic analysis, 76

**Radioimmunoassay**

- mechanism of pulmonary conversion of angiotensin I to angiotensin II in dogs, 682

**Receptor sites**

- angiotensin II antagonist, 664
- circulatory reflex from vagal afferents in response to hemorrhage in dogs, 626

**Reciprocal excitation**

- sympathetic-parasympathetic interactions in the heart, 437

**Red blood cells**

- effects of reduced hematocrit on erythrocyte velocity and fluorescein transit time in cerebral microcirculation, 96

**Reentry activation**

- effect of early atrial premature beat on SA node and atrial rhythm in rabbits, 704

**Reflexes**

- circulatory reflex from vagal afferents in response to hemorrhage in dogs, 626

hypothalamus-carotid sinus interaction, 569

supramedullary participation in carotid sinus reflex, 534

**Renal artery**

- effect of interaction of hypothalamus and carotid sinus mechanoreceptor system, 569
- effects of catecholamines and renal nerve stimulation on renin release, 646
- pressure

antidiuretic effects of acute constriction of inferior vena cava, 479

role of renin-angiotensin system in pathogenesis of severe hypertension in rats, 654

**Renal baroreceptors**

- effects on renin release, 646

**Renal failure**

- intrarenal hemodynamics in glycerol-induced myohemoglobinuric acute renal failure in rats, 128

**Renal hypertension**

- forelimb hemodynamics, 51

**Renal vascular resistance**

- antidiuretic effects of acute constriction of inferior vena cava, 479
- renal conversion of angiotensin I to angiotensin II in dogs, 398

**Renal venous pressure**

- antidiuretic effects of acute constriction of inferior vena cava, 479

**Renin**

- mechanism of pulmonary conversion of angiotensin I to angiotensin II in dogs, 682

**Renin-angiotensin system**

- role in pathogenesis of severe hypertension, 654

**Renin release**

- effects of catecholamines and renal nerve stimulation in nonfiltering kidney, 646
- plasma humoral factor of extrarenal origin causing release of reninlike activity in hypotensive dogs, 446

**Renin secretion**

- effects of cyclic AMP, sympathomimetic amines, and adrenergic receptor antagonists on renin secretion, 239

**Reserpine**

- beta receptor blockade and myocardial effects of cardiac glycosides, 104

**Reynolds number**

- criteria for onset of vascular murmurs, 249

**Rheology**

- anemia and cerebral microcirculation, 96

**Rhythm**

- ectopic atrial, effects of discrete lesions in specialized atrial tracts, 452
- effect of early atrial premature beat on activity of sinoatrial node and atrial rhythm in rabbits, 704

**Rigor mortis**

- diastolic pressure-volume relationship in canine LV, 267

**Rubidium**

- kinetics of rubidium uptake in working dog heart, 208
- transcapillary exchange corrected for shunts, 173

**S****Sarcoplasmic reticular fraction**

- ATPase activity in failing canine heart, 14

**Serotonin**

- histamine and interstitial pulmonary edema in dogs, 323

- reflex apnea, bradycardia and hypotension produced by phenyldiguanide and, acting on nodose ganglia of cats, 145
- Serum enzymes**
  - autoantibody following MI in dogs, 276
- Shock**
  - changes in forelimb weight and segmental vascular resistances following severe hemorrhage, 691
  - hemorrhagic
    - intracortical distribution of renal blood flow, 257
    - significance of splanchnic proteases in production of toxic factor in, 338
- Shunts**
  - quantification of transcapillary exchange in presence of shunt flow, 173
- Sinoatrial node**
  - effect of early atrial premature beat on activity of sinoatrial node and atrial rhythm in rabbits, 704
  - lesions in specialized atrial tracts, 452
- Sinus rate**
  - glucagon and ventricular automaticity, 616
- Sinus tachycardia**
  - antiarrhythmic properties of glucagon, 88
- Skeletal muscle ischemia**
  - adenosine and muscle blood flow, 375
- Skin and skeletal muscle**
  - changes in forelimb weight and segmental vascular resistances following severe hemorrhage, 691
- Sodium**
  - antinatriuretic effects of acute constriction of thoracic and abdominal inferior vena cava, 479
  - influence of sodium and potassium content on arterial responsiveness, 525
  - role of cardiac output and autonomic nervous system in antinatriuresis and vena cava constriction, 490
  - transcapillary exchange corrected for shunts, 173
- Sounds**
  - criteria for onset of vascular murmurs, 249
- Splanchnic blood flow**
  - changes in splanchnic blood flow and blood volume in dogs, 227
- Splanchnic proteases**
  - in hemorrhagic shock, 338
- Stellate ganglion stimulation**
  - sympathetic control of pulmonary vascular impedance in dogs, 555
- Stenoses**
  - criteria for onset of vascular murmurs, 249
- Stimulation**
  - changes in splanchnic blood flow and blood volume in dogs, 227
  - human atrial action potential, 296
- Supramedullary control**
  - carotid sinus reflex in cats, 534
- Supraventricular tachycardia**
  - effect of early atrial premature beat on SA node and atrial rhythm in rabbits, 704
- Sympathetic nervous system**
  - changes in splanchnic blood flow and blood volume in dogs, 227
  - effects of bradykinin and autonomic reflexes, 367
  - intracortical distribution of renal blood flow in shock, 257
  - sympathetic-parasympathetic interactions in heart, 437
- Sympathomimetic amines**
  - intracellular mediation of renin secretion, 239

## T

- Tachycardia**
  - atrial, effect of early atrial premature beat on SA node and atrial rhythm in rabbits, 704
  - ventricular, effects of digitalization, 635
- Thoracic duct lymph**
  - absorption and transport of digitoxin, 419
- Tissues**
  - effect of body surface boundary and tissue inhomogeneity on ECG of the dog, 600
  - repair in arterial tissue, 542
- Tracers.** See Radioisotope tracers
- Transcapillary exchange**
  - theory for quantification of, in presence of shunt flow, 173
  - in working left ventricle of dogs, 181
- Transfer impedance**
  - ECG and thoracic conductivity, 600
- Tritiated water**
  - defining pulmonary extravascular water volume, 385
- Turbulence**
  - criteria for onset of vascular murmurs, 249
- Tyramine**
  - glucagon and ventricular automaticity, 616

## U

- Ultrasound**
  - determination of velocity of circumferential fiber shortening, 610

## V

- Vagal afferents**
  - circulatory reflex in response to hemorrhage in dogs, 626
- Vagal stimulation**
  - glucagon and ventricular automaticity, 616
- Vagotomy**
  - comparison of carotid and aortic reflexes, 119
  - supramedullary participation in carotid sinus reflex, 534
- Vagus nerves**
  - glucagon and ventricular automaticity, 616
  - reflexes from nodose ganglia, 145
- Vasa recta**
  - ferrocyanide and peritubular perfusion, 21
- Vascular impedance**
  - pulmonary vascular response to exercise in dogs, 591
- Vascular permeability**
  - repair in arterial tissue, 542
- Vascular resistances**
  - changes in forelimb weight and segmental vascular resistances following severe hemorrhage, 691
  - muscle cholinergic dilators in sinus baroreceptor response in cats, 350
  - reflex effects of carotid sinus and aortic baroreceptors on hindlimb vascular resistance in dogs, 119
  - renal hypertension in dogs: forelimb hemodynamics, 51
  - See also Peripheral vascular resistance
- Vasoconstriction**
  - influence of sodium and potassium on arterial responsiveness, 525
  - renal conversion of angiotensin I to angiotensin II in dogs, 398

**Vasodilators**

- effects of bradykinin and autonomic reflexes, 367
- muscle cholinergic dilators in sinus baroreceptor response in cats, 350

**Velocity**

- of circumferential fiber shortening, 610

**Vena cava**

- antinatriuretic effects of acute constriction of thoracic and abdominal inferior vena cava, 479
- role of cardiac output and autonomic nervous system in antinatriuretic response to acute constriction of thoracic superior vena cava, 490

**Venoconstriction**

- hemodynamics of renal hypertension, 51

**Venous return**

- antinatriuresis and acute constriction of thoracic superior vena cava, 490

**Ventricles**

- cyclic AMP and myocardial contractility, 468
- effect of different potassium levels on lidocaine and diphenhydantoin, 286
- ischemia and ventricular wall force, 306
- pacing
  - glucagon and ventricular automaticity, 616
- right
  - sympathetic control of pulmonary vascular impedance in dogs, 555
- tachycardia
  - effects of digitalization, 635

- glucagon in prevention and abolition of ouabain-induced, in normokalemic and hypokalemic dogs, 88

**volume**

- diastolic pressure-volume relationships in dogs, 267

**Vibration of arteries**

- effect of low frequency vibration on arterial walls, 136

**V<sub>max</sub> (maximum velocity of shortening)**

- velocity of shortening of unloaded heart muscle and length-tension relation, 63, 610

**Volume conduction**

- ECG and thoracic conductivity, 600

**W****Walls, arterial**

- effect of low frequency vibration on, 136
- repair in arterial tissue, 542

**Wave propagation model**

- phase velocity of arterial pressure waves in vivo, 407

**Wound healing**

- repair in arterial tissue, 542

**X****<sup>133</sup>Xenon washout technique**

- intracortical distribution of renal blood flow in hemorrhagic shock, 257
- intrarenal hemodynamics in acute renal failure, 128

## **SUPPLEMENTS TO CIRCULATION RESEARCH**

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

### **Volumes XXVIII and XXIX**

January-December

1971

#### **I. LOCAL REGULATION OF BLOOD FLOW (American Heart Association Monograph Number 33)**

<b>Foreword</b>	
Simon Rodbard .....	I-1
<b>The Burden of the Resistance Vessels</b>	
Simon Rodbard .....	I-2
<b>Nutritive Collaterals of the Limb</b>	
L. Takacs .....	I-9
<b><sup>86</sup>Rb Extraction as an Indicator of Capillary Flow</b>	
Julius J. Friedman .....	I-15
<b>The Nutritional-Shunt-Flow Hypothesis in Skeletal Muscle Circulation</b>	
Eugene M. Renkin .....	I-21
<b>Role of Hyperosmolarity in the Genesis of Active and Reactive Hyperemia</b>	
J. B. Scott, and D. Radawski .....	I-26
<b>Effect of Infusions of Osmotically Active Substances on Muscle Blood Flow and Systemic Blood Pressure</b>	
Wendell N. Stainsby, and Jack K. Barclay .....	I-33
<b>Role of Tissue Hyperosmolality in Exercise Hyperemia</b>	
Stefan Mellander, and Jan Lundvall .....	I-39
<b>Autoregulation in Normal and Pathological States Including Shock and Ischemia</b>	
Lerner B. Hinshaw .....	I-46
<b>Capillary Control of Blood Flow and Fluid Exchange</b>	
Simon Rodbard .....	I-51
<b>Non-neurogenic Tone in Isolated Perfused Resistance Vessels</b>	
David F. Bohr, Richard L. Verrier, and Joan Sobieski .....	I-59
<b>Oxygen and the Local Regulation of Blood Flow: Possible Significance of Longitudinal Gradients in Arterial Blood Oxygen Tension</b>	
Brian R. Duling, and Robert M. Berne .....	I-65
<b>A New Candidate for Mediator of Functional Vasodilation in Skeletal Muscle</b>	
S. M. Hilton .....	I-70
<b>Interactions Between Oxygen, Potassium, and Osmolality in Regulation of Skeletal Muscle Blood Flow</b>	
N. Sheldon Skinner, Jr., and Jimmy C. Costin .....	I-73
<b>Bioassay and Other Evidence for Participation of Chemical Factors in Local Regulation of Blood Flow</b>	
F. J. Haddy, and J. B. Scott .....	I-86

(Continued)

<b>Autoregulation of the Total Systemic Circulation and Its Relation to Control of Cardiac Output and Arterial Pressure</b>	
Arthur C. Guyton, Harris J. Granger, and Thomas G. Coleman . . . .	I-93
<b>Role of Hypercapnic Acidosis in the Local Regulation of Blood Flow in Skeletal Muscle</b>	
Hermes A. Kontos . . . . .	I-98
<b>Micropuncture Evaluation of Local Control of Arteriolar Resistance of Kidney and Brain</b>	
Klaus Thurau . . . . .	I-106
<b>Adenosine and Adenine Nucleotides as Possible Mediators of Cardiac and Skeletal Muscle Blood Flow Regulation</b>	
Robert M. Berne, Rafael Rubio, James G. Dobson, Jr., and Richard R. Curnish . . . . .	I-115
<b>Application of Circulatory Stop-Flow to the Analysis of Intrarenal Fluid Flux</b>	
Ewald E. Selkurt . . . . .	I-120
<b>Local Regulation of Capillary Pressure</b>	
Benjamin W. Zweifach . . . . .	I-129
<b>Steady State Pulmonary Transvascular Water Filtration in Unanesthetized Sheep</b>	
Norman C. Staub . . . . .	I-135
<b>Redistribution of Left Ventricular Blood Flow Produced by Nitroglycerin: An Example of Integration of the Macro- and Microcirculation</b>	
Martin M. Winbury . . . . .	I-140
<b>Total and Nutritional Coronary Flow</b>	
G. Tillich, L. Mendoza, and Richard J. Bing . . . . .	I-148
<b>Role of Tissue Fluid in Blood Flow Regulation</b>	
Gideon Beer . . . . .	I-154

## II. HYPERTENSION—VOL. XIX: SALT, HORMONES, AND HYPERTENSION

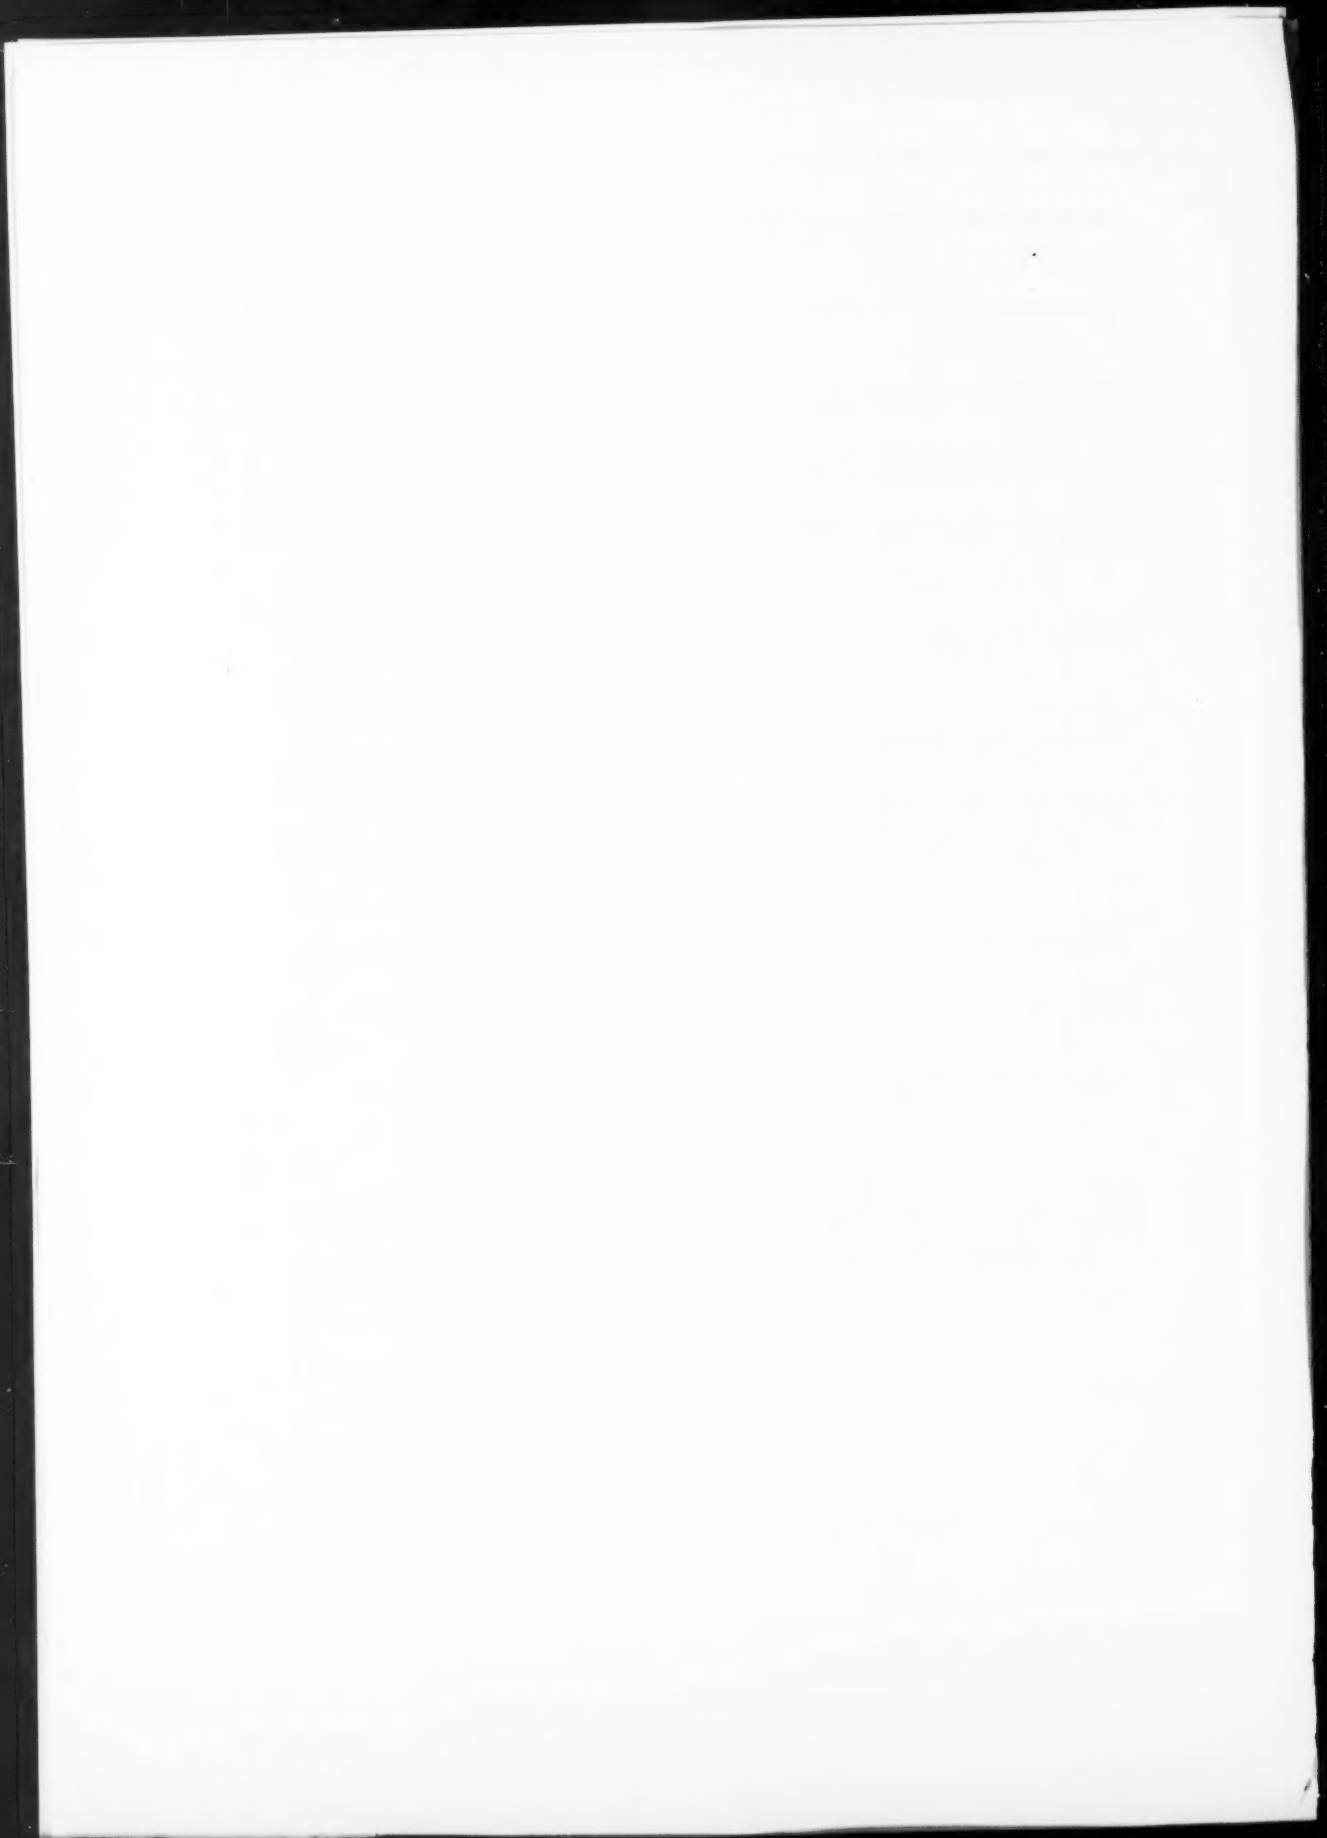

(May, 1971)

<b>Function of the Chronically Diseased Kidney: The Adaptive Nephron</b>	
Carl W. Gottschalk . . . . .	II-1
<b>Sodium Transport in the Toad Bladder: The Functional Organization of the Granular Cell: A Review</b>	
Howard S. Frazier . . . . .	II-14
<b>Further Evidence for a Humoral Natriuretic Factor</b>	
William B. Blythe, Domingos D'Avila, Hillell J. Gitelman, and Louis G. Welt . . . . .	II-21
<b>Further Studies of a Natriuretic Substance Occurring in Human Urine and Plasma</b>	
Jean E. Sealey, and John H. Laragh . . . . .	II-32
<b>Studies of a Humoral Sodium Transport Inhibitory Activity in Normal Dogs and Dogs with Ligation of the Inferior Vena Cava</b>	
Vardaman M. Buckalew, Jr., and Carlton D. Lancaster, Jr. . . . .	II-44

(Continued)

<b>Antihypertensive Effect of Clonidine</b> Gaddo Onesti, Allan B. Schwartz, Kwan E. Kim, Virgilio Paz-Martinez, and Charles Swartz .....	II-53
<b>Effectiveness of Drug Therapy in Hypertension: Present Status: A Review</b> Edward D. Freis .....	II-70
<b>Whole-Body Circulatory Autoregulation and Hypertension</b> Thomas G. Coleman, Harris J. Granger, and Arthur C. Guyton .....	II-76
<b>Calcium and Vascular Smooth Muscle Contraction</b> Charles L. Seidel, and David F. Bohr .....	II-88
<b>Effects of Angiotensin Infusion on Catecholamine Uptake and Reactivity in Blood Vessels</b> Philip A. Khairallah, D. Davila, N. Papanicolaou, Nancy M. Glende, and Philippe Meyer .....	II-96
<b>Adrenal Medullary Stimulation Induced by Angiotensin I, Angiotensin II, and Analogues</b> Michael J. Peach .....	II-107
<b>Evidence for a Renal Vascular Mechanism in Renin Release: New Observations with Graded Stimulation by Aortic Constriction</b> Edward H. Blane, and James O. Davis .....	II-118
<b>Microangiopathic Hemolytic Anemia and the Development of the Malignant Phase of Hypertension</b> Haralambos Gavras, William C. B. Brown, Jehoiada J. Brown, Anthony F. Lever, Adam L. Linton, Robert F. MacAdam, George P. McNicol, J. Ian S. Robertson, and Charles Wardrop .....	II-127
<b>18-Hydroxy-Deoxycorticosterone in Human Hypertension</b> James C. Melby, Sidney L. Dale, and Thomas E. Wilson .....	II-143
<b>18-Hydroxy-Deoxycorticosterone Secretion in Experimental Hypertension in Rats</b> John P. Rapp, and Lewis K. Dahl .....	II-153
<b>Malignant Hypertension: Effect of Therapy on Renin and Aldosterone</b> R. G. McAllister, Jr., Charles W. Van Way, III, Kioomars Dayani, William J. Anderson, Eugene Temple, Andrew M. Michelakis, William S. Coppage, Jr., and John A. Oates .....	II-160
<b>Determination of Plasma Renin Concentration by Angiotensin I Immunoassay: Diagnostic Import of Precise Measurement of Subnormal Renin in Hyperaldosteronism</b> Jan R. Stockigt, R. Dennis Collins, and Edward Biglieri .....	II-175

## SUPPLEMENT SUBJECT INDEX

VOLUMES XXVIII AND XXIX

JANUARY-DECEMBER, 1971

### A

#### ACTH

18-hydroxy-deoxycorticosterone in human hypertension, II-143

#### Adenine nucleotides

adenosine and, as mediators of cardiac and skeletal muscle blood flow regulation, I-115  
bioassay and chemical factors in local regulation of blood flow, I-86

#### Adrenal adenoma

determination of plasma renin concentration by angiotensin I immunoassay, II-175

#### Adrenal medulla

stimulation induced by angiotensin I, angiotensin II and analogues, II-107

#### Adrenal steroidogenesis

18-hydroxy-deoxycorticosterone secretion in hypertension in rats, II-153

#### Adrenalectomy

evidence for renal vascular mechanism in renin release, II-118

#### Aldosterone excretion

determination of plasma renin concentration by angiotensin I immunoassay, II-175  
18-hydroxy-deoxycorticosterone in human hypertension, II-143  
malignant hypertension: effect of therapy on renin and aldosterone, II-260

#### Amphotericin B

sodium transport in toad bladder, II-14

#### Anemia

microangiopathic hemolytic and malignant phase hypertension, II-127

#### Angiotensin

adrenal medullary stimulation induced by angiotensin I, angiotensin II and analogues, II-107  
determination of plasma renin concentration by angiotensin I immunoassay, II-175  
effect on secretion of 18-hydroxy-deoxycorticosterone in hypertension, II-143  
effects on catecholamine uptake and reactivity in blood vessels, II-96

#### Animals

##### cats

new candidate for mediator of functional vasodilatation in skeletal muscles, I-70  
nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21  
role of tissue hyperosmolality in exercise hyperemia, I-39  
total and nutritional coronary flow, I-148

##### dogs

autoregulation in normal and pathological states including shock and ischemia, I-46  
bioassay and chemical factors in local regulation of blood flow, I-86  
circulatory stop-flow technique applied to intrarenal fluid flux, I-120  
effect of infusion of osmotically active substances on muscle blood flow and blood pressure, I-33  
evidence for renal vascular mechanism in renin release, II-118  
further evidence for a humoral natriuretic factor, II-21

humoral sodium transport inhibitory activity, II-44  
role of hypercapnic acidosis in local regulation of blood flow in skeletal muscle, I-98  
role of tissue fluid in blood flow regulation, I-154  
<sup>86</sup>Rb extraction as indicator of capillary flow, I-15  
whole-body circulatory autoregulation and hypertension, II-76

##### hamsters

oxygen and local regulation of blood flow, I-65

##### rabbits

calcium and vascular smooth muscle contraction, II-88  
effects of angiotensin on catecholamine uptake, II-96

##### rats

18-hydroxy-deoxycorticosterone secretion in experimental hypertension, II-153  
microangiopathic hemolytic anemia and malignant phase hypertension, II-127  
natriuretic substance occurring in urine and plasma, II-32  
non-neurogenic tone in isolated perfused resistance vessels, I-59  
nutritive collaterals of the hind limb after femoral artery occlusion, I-9

##### sheep

determination of plasma renin concentration by angiotensin I immunoassay, II-175  
steady state pulmonary transvascular water filtration in sheep, I-135

##### toads

sodium transport in the toad bladder: functional organization of granular cell, II-14

#### Antibodies

effects of angiotensin infusion on catecholamine uptake and reactivity in blood vessels, II-96

#### Antihypertensive drugs

present status, II-70

#### Antinatriuresis

humoral sodium transport inhibitory activity in dogs, II-44

#### Antipyrine

nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21

#### Aorta

evidence for renal vascular mechanism in renin release: new observations with graded stimulation by aortic constriction, II-118

#### Arterial compliance

role of tissue fluid in blood flow regulation, I-154

#### Arterial pressure

autoregulation of total systemic circulation and its relation to cardiac output and, I-93  
role of tissue fluid in blood flow regulation, I-154  
whole-body circulatory autoregulation and hypertension, II-76

#### Arteriolar resistance

micropuncture evaluation of local control of arteriolar resistance of kidney and brain, I-106

#### Arterioles

oxygen and local regulation of blood flow, I-65  
redistribution of LV blood flow produced by nitroglycerin, I-140

**Atropine**

nutritive collaterals of the limb, I-9

**Autoregulation**

adenosine and adenine nucleotides as mediators of cardiac and skeletal muscle blood flow regulation, I-115  
 bioassay and other evidence for participation of chemical factors in local regulation of blood flow, I-86  
 capillary control of blood flow and fluid exchange, I-51  
 effect of infusion of osmotically active substances on muscle blood flow and blood pressure, I-33  
 in normal and pathological states including shock and ischemia, I-46  
 redistribution of LV blood flow produced by nitroglycerin, I-140  
 resistance vessels, I-2  
 of total systemic circulation and its relation to cardiac output and arterial pressure, I-93  
 whole-body circulatory autoregulation and hypertension, II-76

**B****Baroreceptors**

evidence for renal vascular mechanism in renin release, II-118

**Bioassay**

natriuretic substance occurring in human urine and plasma, II-32  
 and other evidence for participation of chemical factors in local regulation of blood flow, I-86

**Bladder**

sodium transport in toad, II-14

**Blood flow**

capillary  
   control of blood flow and fluid exchange, I-51  
   <sup>86</sup>Rb as indicator of, I-15  
 humoral natriuretic factor, II-21  
 LV  
   redistribution produced by nitroglycerin, I-140  
 local regulation. *See* Local regulation of blood flow  
 muscle  
   effect of infusion of osmotically active substances on muscle blood flow and systemic blood pressure, I-33  
   new candidate for mediator of functional vasodilatation in skeletal muscles, I-70  
 nutritive collaterals of the limb, I-9  
 renal, antihypertensive effect of clonidine, II-53  
 skeletal muscle  
   adenosine and adenine nucleotides as mediators of cardiac and skeletal muscle blood flow regulation, I-115  
   interactions between oxygen, potassium, and osmolality in regulation of, I-73  
   role of hypercapnic acidosis in local regulation of, I-98  
 total and nutritional coronary flow, I-148  
 whole-body circulatory autoregulation and hypertension, II-76

**Blood pressure**

antihypertensive affect of clonidine, II-53  
 effect of infusion of osmotically active substances on muscle blood flow and blood pressure, I-33  
 whole-body circulatory autoregulation and hypertension, II-76

**Blood sludge**

resistance vessels, I-2

**Blood vessels**

effects of angiotensin infusion on catecholamine uptake and reactivity in blood vessels, II-96

**Blood viscosity**

resistance vessels, I-2

**Brain**

micropuncture evaluation of local control of arteriolar resistance of brain and kidneys, I-106

**C****Calcium**

vascular smooth muscle contraction, II-88

**Capillaries**

capillary control of blood flow and fluid exchange, I-51  
 circulatory stop-flow technique applied to intrarenal fluid flux, I-120  
 filtration, role of tissue fluid in blood flow regulation, I-154  
 local regulation of capillary pressure, I-129  
 nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21  
 pressure, steady state pulmonary transvascular water filtration in sheep, I-135  
<sup>86</sup>Rb as indicator of capillary flow, I-15

**"Capillaron" model**

role of tissue fluid in blood flow regulation, I-154

**Carbon dioxide**

role of hypercapnic acidosis in local regulation of blood flow in skeletal muscle, I-98

**Cardiac output**

antihypertensive effect of clonidine, II-53  
 autoregulation of total systemic circulation and its relation to cardiac output and arterial pressure, I-93  
 whole-body circulatory autoregulation and hypertension, II-76

**Catapres. *See* Clonidine****Catecholamines**

adrenal medullary stimulation induced by angiotensin I, angiotensin II and analogues, II-107  
 effects of angiotensin infusion on catecholamine uptake and reactivity in blood vessels, II-96

**Cells**

granular, sodium transport in the toad bladder, II-14

**Cerebral arteriolar resistance**

micropuncture evaluation of, I-106

**Chemical analyses**

bioassay and other evidence for participation of chemical factors in local regulation of blood flow, I-86

**Circulation**

autoregulation of total systemic circulation and its relation to cardiac output and arterial pressure, I-93  
 collateral  
   nutritive, in triceps muscles of hind limbs after femoral artery occlusion, I-9  
 coronary  
   adenosine and adenine nucleotides as mediators of cardiac and skeletal muscle blood flow regulation, I-115  
 pulmonary  
   steady state pulmonary transvascular water filtration in sheep, I-135  
 redistribution of LV blood flow produced by nitroglycerin, I-140  
 skeletal muscle, nutritional-shunt-flow hypothesis, I-21

- whole-body circulatory autoregulation and hypertension, II-76
- Circulatory stop-flow technique**  
applied to analysis of intrarenal fluid flux, I-120
- Clonidine**  
antihypertensive effect of, II-53
- Coagulation, intravascular**  
microangiopathic hemolytic anemia and malignant phase hypertension, II-127
- Collateral circulation**  
nutritive, in triceps muscle of hind limbs after femoral artery occlusion, I-9
- Colloid osmotic pressure**  
local regulation of capillary pressure, I-129  
steady state pulmonary transvascular water filtration in sheep, I-135
- Column chromatography**  
humoral sodium transport inhibitory activity in dogs, II-44
- Conductance**  
capillary control of blood flow and fluid exchange, I-51  
vascular anatomy and, I-2
- Contractility**  
calcium and vascular smooth muscle contraction, II-88
- Coronary blood flow**  
total and nutritional coronary flow, I-148
- Coronary resistance**  
adenosine and adenine nucleotides as mediators of cardiac and skeletal muscle blood flow regulation, I-115
- Coronary shunt flow**  
total and nutritional coronary flow, I-148
- Creatinine clearance**  
chronically diseased kidney, II-1
- Cremaster muscle**  
oxygen and local regulation of blood flow, I-65
- Cross-circulation techniques**  
further evidence for humoral natriuretic factor, II-21
- Cross-tachyphylaxis**  
adrenal medullary stimulation induced by angiotensin I, angiotensin II and analogues, II-107

**D**

- Deoxycorticosterone**  
determination of plasma renin concentration by angiotensin I immunoassay, II-175  
18-hydroxy-deoxycorticosterone  
in human hypertension, II-143  
secretion in hypertension in rats, II-153
- Dexamethasone suppression**  
18-hydroxy-deoxycorticosterone in human hypertension, II-143
- Distensibility**  
resistance vessels, I-2
- DMAE**  
adrenal medullary stimulation induced by angiotensin I, angiotensin II and analogues, II-107
- DOCA**  
microangiopathic hemolytic anemia and malignant phase hypertension, II-127
- Drug therapy**  
clonidine, II-53  
effectiveness in hypertension, II-70
- Dye dilution techniques**  
nutritive collaterals of the limb, I-9

**E**

- Electrical potential**  
sodium transport in toad bladder, II-14

*Circulation Research*, Vol. XXIX, December 1971

- Electrolyte concentration**  
chronically diseased kidney, II-1
- Endocardium**  
redistribution of LV blood flow produced by nitroglycerin, I-140
- Epicardium**  
redistribution of LV blood flow produced by nitroglycerin, I-140
- Epinephrine**  
nutritive collaterals of the limb, I-9
- Exercise**  
hyperemia  
interactions between oxygen, potassium, and osmolality in regulation of skeletal muscle blood flow, I-73  
role of tissue hyperosmolality in, I-39
- Expansion experiments**  
further evidence for a humoral natriuretic factor, II-21
- Extracellular fluid volume**  
further evidence for humoral natriuretic factor, II-21

**F**

- Femoral arteries**  
occlusions, nutritive collaterals of the limb after, I-9
- Fibrinoid lesions**  
microangiopathic hemolytic anemia and malignant phase hypertension, II-127
- Fluid exchange**  
capillary control of blood flow and, I-51
- Fluid flux**  
circulatory stop-flow technique applied to intrarenal fluid flux, I-120
- Fractionation studies**  
natriuretic substance occurring in urine and plasma, II-32

**G**

- Glomerular filtration rate**  
chronically diseased kidney, II-1  
natriuretic substance occurring in urine and plasma, II-32
- Glomerulonephritis**  
microangiopathic hemolytic anemia and malignant phase hypertension, II-127
- Gracilis muscle**  
role of hyperosmolality in genesis of active and reactive hyperemia, I-26
- Granular cells**  
sodium transport in toad bladder, II-14

**H**

- Heart**  
bioassay and chemical factors in local regulation of blood flow, I-86
- Hematocrit**  
circulatory stop-flow technique applied to intrarenal fluid flux, I-120
- Hemodynamic studies**  
clonidine, antihypertensive effect of, II-53  
micropuncture evaluation of local control of arteriolar resistance of kidney and brain, I-106
- Hemorrhage**  
evidence for renal vascular mechanism in renin release, II-118

- Hindlimb**  
 bioassay and chemical factors in local regulation of blood flow, I-86
- Humoral factors**  
 in diminished net tubular reabsorption of sodium, II-21  
 humoral sodium transport inhibitory activity in normal dogs and dogs with ligation of inferior vena cava, II-44  
 natriuretic substance occurring in urine and plasma, II-32
- Hydralazine**  
 effectiveness of drug therapy in hypertension, II-70
- Hydrochlorothiazide**  
 effectiveness of in hypertension, II-70
- Hydrogen**  
 bioassay and chemical factors in local regulation of blood flow, I-86  
 role of hyperosmolality in genesis of active and reactive hyperemia, I-26
- Hyperaldosteronism**  
 determination of plasma renin concentration by angiotensin I immunoassay: diagnostic import of subnormal renin in, II-175  
 diagnostic import of precise measurement of subnormal renin in, II-175  
 malignant hypertension: effect of therapy on renin and aldosterone, II-160
- Hypercapnia**  
 role of hypercapnic acidosis in local regulation of blood flow in skeletal muscle, I-98
- Hyperemia**  
 bioassay and chemical factors in local regulation of blood flow, I-86  
 capillary control of blood flow and fluid exchange, I-51  
 exercise  
   interactions between oxygen, potassium and osmolality in regulation of skeletal muscle blood flow, I-73  
   role of tissue hyperosmolality in, I-39  
 inhibition of, I-2  
 new candidate for mediator of functional vasodilatation in skeletal muscles, I-70  
 reactive  
   circulatory stop-flow technique applied to intrarenal fluid flux, I-120  
   role of hyperosmolality in genesis of active and, I-26  
 role of hypercapnic acidosis in local regulation of blood flow in skeletal muscle, I-98
- Hyperosmolality**  
 role of tissue hyperosmolality in exercise hyperemia, I-39
- Hyperosmolarity**  
 in genesis of active and reactive hyperemia, I-26
- Hyperplasia**  
 determination of plasma renin concentration by angiotensin I immunoassay, II-175
- Hypertension**  
 antihypertensive drugs  
   clonidine, II-53  
   present status, II-70  
 autoregulation of total systemic circulation and its relation to cardiac output and arterial pressure, I-93  
 chronically diseased kidney, II-1  
 effects of angiotensin on catecholamine uptake, II-96  
 18-hydroxy-deoxycorticosterone, II-143  
   secretion in rats, II-153  
 humoral natriuretic factor, II-21

- humoral sodium transport inhibitory activity in dogs, II-44
- malignant  
 effect of therapy on renin and aldosterone, II-160  
 microangiopathic hemolytic anemia and, II-127  
 natriuretic substance occurring in urine and plasma, II-32  
 sodium transport in toad bladder, II-14  
 whole-body circulatory autoregulation and, II-76
- Hypoxia**  
 adenosine and adenine nucleotides as mediators of cardiac and skeletal muscle blood flow regulation, I-115  
 effects on autoregulation, I-46

## I

- Immunoassay**  
 determination of plasma renin concentration by angiotensin I immunoassay, II-175
- Indicator-dilution techniques**  
 nutritive collaterals of the limb, I-9  
<sup>86</sup>Rb extraction as indicator of capillary flow, I-15
- Infusions**  
 role of tissue hyperosmolality in exercise hyperemia, I-39
- Intravascular coagulation**  
 microangiopathic hemolytic anemia and malignant phase hypertension, II-127
- Ischemia**  
 adenosine and adenine nucleotides as possible mediators of cardiac and skeletal muscle blood flow regulation, I-115  
 autoregulation in shock and, I-46
- Isolated vasculature**  
 role of tissue hyperosmolality in exercise hyperemia, I-39
- Isoproterenol**  
 calcium and vascular smooth muscle contraction, II-88
- Isotopic methods**  
 total and nutritional coronary flow, I-148

## J

- Juxtaglomerular index**  
 18-hydroxy-deoxycorticosterone secretion in hypertension in rats, II-153

## K

- Kidneys**  
 autoregulation in normal and pathological states including shock and ischemia, I-46  
 bioassay and chemical factors in local regulation of blood flow, I-86  
 circulatory stop-flow technique applied to analysis of intrarenal fluid flux, I-120  
 function of chronically diseased kidney: adaptive nephron, II-1  
 functional and structural adaptations in the diseased kidney, II-1  
 humoral natriuretic factor, II-21  
 micropuncture evaluation of local control of arteriolar resistance of brain and, I-106  
 nonfiltering, evidence for renal vascular mechanism in renin release, II-118  
 whole-body circulatory autoregulation and hypertension, II-76

**L****Left stellate stimulation**

role of hyperosmolarity in genesis of active and reactive hyperemia, I-26

**Length**

resistance vessels, I-2

**Limb blood flow**

bioassay and chemical factors in local regulation of blood flow, I-86

effect of infusion of osmotically active substances on muscle blood flow and blood pressure, I-33

nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21

nutritive collaterals of the limb after femoral artery occlusion, I-9

role of hypercapnic acidosis in local regulation of blood flow in skeletal muscle, I-98

role of tissue hyperosmolality in exercise hyperemia, I-39

**Local regulation of blood flow**

adenosine and adenine nucleotides as mediators of cardiac and skeletal muscle blood flow regulation, I-115

autoregulation in normal and pathological states including shock and ischemia, I-46

autoregulation of total systemic circulation and its relation to cardiac output and arterial pressure, I-93

bioassay and other evidence for participation of chemical factors in, I-86

capillary control of blood flow and fluid exchange, I-51

capillary pressure, I-129

circulatory stop-flow technique applied to analysis of intrarenal fluid flux, I-120

interactions between oxygen, potassium, and osmolality in regulation of skeletal muscle blood flow, I-73

micropuncture evaluation of local control of arteriolar resistance of kidney and brain, I-106

new candidate for mediator of functional vasodilatation in skeletal muscles, I-70

nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21

nutritive collaterals of the limb, I-9

possible significance of longitudinal gradients in arterial blood oxygen tension, I-65

redistribution of LV blood flow produced by nitroglycerin, I-140

resistance vessels, I-1

role of hypercapnic acidosis, I-98

role of tissue fluid, I-154

role of tissue hyperosmolarity in exercise hyperemia, I-39

steady state pulmonary transvascular water filtration in sheep, I-135

total and nutritional coronary flow, I-148

**Lungs**

steady state pulmonary transvascular water filtration in sheep, I-135

**Lymphatics**

capillary control of blood flow and fluid exchange, I-51

steady state pulmonary transvascular water filtration in sheep, I-135

**M****Macula densa cells**

evidence for renal vascular mechanism in renin release, II-118

**Magnesium**

bioassay and chemical factors in local regulation of blood flow, I-86

role of hyperosmolarity in genesis of active and reactive hyperemia, I-26

**Membrane permeability**

sodium transport in toad bladder, II-14

**Mesenteric vessels**

local regulation of capillary pressure, I-129

non-neurogenic tone in isolated perfused resistance vessels, I-59

**Metaraminol**

effects of angiotensin on catecholamine uptake, II-96

**Microangiopathic hemolytic anemia**

malignant phase hypertension and, II-127

**Microcirculation**

oxygen and local regulation of blood flow, I-65

redistribution of LV blood flow produced by nitroglycerin, I-140

total and nutritional coronary flow, I-148

**Micropuncture technique**

evaluation of local control of arteriolar resistance of kidney and brain, I-106

**Microspheres**

redistribution of LV blood flow produced by nitroglycerin, I-140

**Microvascular response**

role of tissue hyperosmolality in exercise hyperemia, I-39

**Mineralocorticoids**

18-hydroxy-deoxycorticosterone in human hypertension, II-143

18-hydroxy-deoxycorticosterone secretion in hypertension in rats, II-153

**Muscles**

blood flow, new candidate for mediator of functional vasodilatation in skeletal muscles, I-70

calcium and vascular smooth muscle contraction, II-88

effect of infusions of osmotically active substances on muscle blood flow and systemic blood pressure, I-33

role of hyperosmolarity in genesis of active and reactive hyperemia, I-26

triceps, nutritive collaterals of the limb, I-9

**Myocardium**

adenosine and adenine nucleotides as possible mediators of cardiac and skeletal muscle blood flow regulation, I-115

**Myogenic tone**

non-neurogenic tone in isolated perfused resistance vessels, I-59

**N****Natriuresis**

further evidence for a humoral natriuretic factor, II-21

further studies of natriuretic substance occurring in human urine and plasma, II-32

humoral sodium transport inhibitory activity in dogs, II-44

**Nephrectomy**

microangiopathic hemolytic anemia and malignant phase hypertension, II-127

**Nephrons**

adaptive, chronically diseased kidney, II-1

**Nervous system**

sympathetic, effects of angiotensin infusion on catecholamine uptake, II-96

- Nitroglycerin**  
redistribution of LV blood flow produced by, I-140
- Norepinephrine**  
calcium and vascular smooth muscle contraction, II-88  
effects of angiotensin infusion on catecholamine uptake and reactivity in blood vessels, II-96
- Nutritive blood flow**  
nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21  
nutritive collaterals of the limb, I-9  
redistribution of LV blood flow produced by nitroglycerin, I-140  
total and nutritional coronary flow, I-148
- Nutritive/shunt flow**  
capillary control of blood flow and fluid exchange, I-51  
hypothesis in skeletal muscle circulation, I-21

## O

- Occlusions**  
femoral artery, nutritive collaterals of the limb, I-9  
renal artery, effects on autoregulation, I-46
- Osmolality**  
interactions between oxygen, potassium, and osmolality in regulation of skeletal muscle blood flow, I-73
- Osmolarity**  
bioassay and chemical factors in local regulation of blood flow, I-86  
effect of infusions of osmotically active substances on muscle blood flow and systemic blood pressure, I-33
- Oxygen**  
interactions between oxygen, potassium, and osmolality in regulation of skeletal muscle blood flow, I-73  
local regulation of blood flow and, I-65  
possible significance of longitudinal gradients in arterial blood oxygen tension, I-65  
redistribution of LV blood flow produced by nitroglycerin, I-140

## P

- Pathology**  
autoregulation in normal and pathological states including shock and ischemia, I-46
- Peptides**  
adrenal medullary stimulation induced by angiotensin I, angiotensin II and analogues, II-107
- Perfusion**  
non-neurogenic tone in isolated perfused resistance vessels, I-59  
nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21
- Peripheral resistance**  
autoregulation of total systemic circulation and its relation to cardiac output and arterial pressure, I-93  
whole-body circulatory autoregulation and hypertension, II-76
- Pharmacology**  
clonidine, II-53
- Phenoxybenzamine**  
nutritive collaterals of the limb, I-9
- Phosphate**  
new candidate for mediator of functional vasodilation in skeletal muscles, I-70

- Phosphate excretion**  
chronically diseased kidney, II-1
- Physiology**  
resistance vessels, I-2
- Plasma**  
calcium and vascular smooth muscle contraction, II-88  
humoral sodium transport inhibitory activity in dogs, II-44  
natriuretic substance occurring in human urine and, II-32
- Plasma renin activity**  
antihypertensive effects of clonidine, II-53  
determination of plasma renin concentration by angiotensin I immunoassay, II-175  
18-hydroxy-deoxycorticosterone in human hypertension, II-143  
evidence for renal vascular mechanism in renin release, II-118  
malignant hypertension: effect of therapy on renin and aldosterone, II-160
- Potassium**  
bioassay and chemical factors in local regulation of blood flow, I-86  
chronically diseased kidney, II-1  
interactions between oxygen, potassium, and osmolality in regulation of skeletal muscle blood flow, I-73  
role of hyperosmolality in genesis of active and reactive hyperemia, I-26
- Pressure**  
arterial  
autoregulation of total systemic circulation and its relation to cardiac output and, I-93  
role of tissue fluid in blood flow regulation, I-154  
capillary  
local regulation of, I-129  
steady state pulmonary transvascular water filtration in sheep, I-135
- Propranolol**  
nutritive collaterals of the limb, I-9
- Pulmonary transvascular water flow**  
steady state filtration in sheep, I-135

## R

- Radioimmunoassay**  
determination of plasma renin concentration by angiotensin I immunoassay, II-175
- Radioisotope tracers**  
calcium and vascular smooth muscle contraction, II-88  
determination of plasma renin concentration by angiotensin I immunoassay, II-175  
18-hydroxy-deoxycorticosterone in human hypertension, II-143
- <sup>86</sup>Rb**  
indicator of capillary flow, I-15  
nutritive collaterals of the limb, I-9  
redistribution of LV blood flow produced by nitroglycerin, I-140
- Receptors**  
adrenal medullary stimulation induced by angiotensin I, angiotensin II and analogues, II-107
- Renal arteries**  
occlusions, autoregulation in normal and pathological states, I-46
- Renal arteriolar resistance**  
micropuncture evaluation of, I-106
- Renal blood flow**  
antihypertensive effect of clonidine, II-53
- Renal disease**  
chronically diseased kidney, II-1

**Renal failure**

microangiopathic hemolytic anemia and malignant phase hypertension, II-127

**Renal vascular resistance**

autoregulation in normal and pathological states including shock and ischemia, I-46

**Renal venous pressure**

circulatory stop-flow technique applied to intrarenal fluid flux, I-120

**Renin**

antihypertensive effect of clonidine, II-53  
determination of plasma renin concentration by angiotensin I immunoassay, II-175  
malignant hypertension: effect of therapy on renin and aldosterone, II-260

**Renin release**

evidence for renal vascular mechanism in, II-118

**Reserpine**

effectiveness in hypertension, II-70

**Resistance vessels**

burden of, I-2  
capillary control of blood flow and fluid exchange, I-51  
non-neurogenic tone in isolated perfused resistance vessels, I-59  
role of tissue hyperosmolality in exercise hyperemia, I-39

**Rubidium**

indicator of capillary flow, I-15  
redistribution of LV blood flow produced by nitroglycerin, I-140  
total and nutritional coronary flow, I-148

**S****Saline loading**

humoral sodium transport inhibitory activity in dogs, II-44

**Sarcoplasmic reticulum**

calcium and vascular smooth muscle contraction, II-88

**Shock**

autoregulation in normal and pathological states including ischemia and, I-46

**Shunt flow**

nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21

**Skeletal muscle**

bioassay and chemical factors in local regulation of blood flow, I-86  
blood flow  
adenosine and adenine nucleotides as mediators of cardiac and skeletal muscle blood flow regulation, I-115  
interactions between oxygen, potassium, and osmolality in regulation of, I-73  
local regulation of capillary pressure, I-129  
new candidate for mediator of functional vasodilation in, I-70  
non-neurogenic tone in isolated perfused resistance vessels, I-59  
nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21  
role of hypercapnic acidosis in local regulation of blood flow in skeletal muscle, I-98  
role of hyperosmolality in genesis of active and reactive hyperemia, I-26  
role of tissue hyperosmolality in exercise hyperemia, I-39  
<sup>86</sup>Rb extraction as indicator of capillary flow, I-15

**Sodium**

chronically diseased kidney, II-1

further evidence for a humoral natriuretic factor, II-21

humoral sodium transport inhibitory activity in dogs with ligation of inferior vena cava, II-44

18-hydroxy-deoxycorticosterone secretion in experimental hypertension in rats, II-153

malignant hypertension: effect of therapy on renin and aldosterone, II-160

natriuretic substance occurring in urine and plasma, II-32

transport in the toad bladder: functional organization of the granular cell, II-14

**Spironolactone**

18-hydroxy-deoxycorticosterone in human hypertension, II-143

**ST-155. See Clonidine****Starling relationship**

local regulation of capillary pressure, I-129  
steady state pulmonary transvascular water filtration in sheep, I-135

**Stimulation**

left stellate, role of hyperosmolality in genesis of active and reactive hyperemia, I-26

**Structure-activity studies**

adrenal medullary stimulation induced by angiotensin I, angiotensin II and analogues, II-107

**Sympathetic nervous system**

antihypertensive effect of clonidine, II-53

**Sympathetic stimulation autoregulation**

local regulation of blood flow, I-2

**T****Tissues**

bioassay and chemical factors in local regulation of blood flow, I-86  
capillary control of blood flow and fluid exchange, I-51  
role of tissue fluid in blood flow regulation, I-154  
role of tissue hyperosmolality in exercise hyperemia, I-39

**Tonic contraction**

non-neurogenic tone in isolated perfused resistance vessels, I-59

**Transcapillary exchange**

circulatory stop-flow technique applied to intrarenal fluid flux, I-120  
nutritional-shunt-flow hypothesis in skeletal muscle circulation, I-21  
<sup>86</sup>Rb as indicator of capillary flow, I-15

**Transmural gradients**

redistribution of LV blood flow produced by nitroglycerin, I-140

**Tubular transport**

chronically diseased kidney, II-1

**U****Urea clearance**

chronically diseased kidney, II-1

**Urinary bladder**

sodium transport in toad bladder, II-14

**Urine**

natriuretic substance occurring in human plasma and, II-32

**V****Vascular caliber**

resistance vessels, I-2

**Vascular conductance**

burden of resistance vessels, I-2

- capillary control of blood flow and fluid exchange, I-51
  - Vascular length**
    - resistance vessels, I-2
  - Vascular resistance**
    - capillary control of blood flow and fluid exchange, I-51
    - non-neurogenic tone in isolated perfused resistance vessels, I-59
    - resistance vessels, I-2
    - role of tissue fluid in blood flow regulation, I-154
  - Vasoactive substances**
    - resistance vessels, I-2
  - Vasodilation**
    - interactions between oxygen, potassium, and osmolality in regulation of skeletal muscle blood flow, I-73
    - new candidate for mediator of functional vasodilation in skeletal muscle, I-70
    - role of hypercapnic acidosis in local regulation of blood flow in skeletal muscle, I-98
  - role of tissue hyperosmolality in exercise hyperemia, I-39
  - Vasopressin**
    - sodium transport in toad bladder, II-14
  - Vessel radius**
    - resistance vessels, I-2
  - Veterans Administration (VA) Cooperative Study**
    - effectiveness of drug therapy in hypertension: present status, II-70
  - Volume**
    - extracellular fluid, further evidence for humoral natriuretic factor, II-21
  - Volume loading**
    - role of tissue fluid in blood flow regulation, I-154
- W**
- Wall thickness**
    - resistance vessels, I-2
  - Water transport**
    - sodium transport in toad bladder, II-14
